## PARSONS THE NEW SCHOOL FOR DESIGN Associate in Applied Science in Fashion Design

By the successful completion of this program, a student should be able to demonstrate:

Formulate individual responses to design principles and creative standards common to all design fields, and evaluate pragmatic and creative issues.

Demonstrate an ability to produce original designs from concept, to product with clarity as to 2D to 3D choices.

Assess the interconnectivity between fabric/material weight/texture and product representation, and evidence an ability to select and edit appropriately.

Assess the structure of the global fashion industry through its sourcing and manufacturing processes with a developed social awareness and consciousness as to impact of those choices.

Develop independent approaches to visual presentation and visual literacy utilizing appropriate processes and/or information technologies.

Comprehend the fashion industry and its systems and structures, and evidence an ability to suitably apply specific knowledge.
