NEW
SCHOOL

TISHMAN ENVIRONMENT
AND DESIGN CENTER

Recycling is required by law in New York City and collected in every building on campus. Recycle batteries, cell phones, and old mp3 players in the blue tubes in the lobbies of most buildings on campus. Follow the signs on or above bins around campus to help keep other recyclables from going to landfills:

Mixed Paper (cardboard, magazines, newspapers, paper bags, and pizza boxes)
Glass, Plastic, Metal, and Cartons (glass bottles, plastic bottles, metal cans, juice boxes and cartons)
Landfill (styrofoam, plastic grocery bags, food containers, paper cups and lids)

Compost is collected anywhere food is sold on campus. Composting reduces the amount of waste sent to landfill or incinerated. In addition to all types of food scraps, to-go cups, containers, cutlery and napkins sold at The New School are compostable. Compost is also collected every Monday, Wednesday, Friday, and Saturday at the Union Square Green Market. *For more information go to bit.ly/greenmarketcompost.*

The sustainability mission at New School Dining is to provide farm-to-table real food, promoting the health of our students, community and planet. We partner with:

The Food Recovery Network to donate our leftover food.
Humane Society of the United States to promote Meatless Mondays.
The Green Restaurant Association to further green our facilities.
Real Food Challenge to analyze and increase our “Real Food” purchases.

Food from local farms travels fewer miles and is often less environmentally damaging than conventional produce. New Schoolers can purchase amazing local produce at the Union Square Greenmarket, open Monday, Wednesday, Friday, and Saturday.

Sign up with Corbin Hill Food Project, the farm share on campus, to have your produce delivered fresh from upstate farms. Corbin Hill delivers to the lobby at 2 West 13th Street for convenient pick-up. *For more information go to bit.ly/CorbinHillAtTNS*

There are a number of Citi Bike stations around campus. Stop by the TEDC Office on the 16th floor at 79 Fifth Avenue to pick up a free NYC bike map. *Go to citibikenyc.com/tns to register at a discounted rate with promo code newride72*

The New School’s Making Center and studio spaces offer students unprecedented opportunities to acquire industry-ready skills, transform how products are made, and upend conventional notions of supply chains, local production, mass customization, and craft. Always check the Green Supply Center at 2 West 13th Street to up-cycle, recycle, and sustainably dispose of excess materials. The New School’s libraries and computer labs are great places to research, study and create. Be sure to make the most of your printing credit by printing double sided whenever possible.

If you choose to reduce your carbon footprint and increase your physical fitness by biking, you can store your bike in the bike storage room in the University Center, or lock it on a bike rack on the street.

Materials flow in and out of The New School every day: food is delivered to the cafeterias, paper and supplies are delivered to offices and libraries, students and faculty bring in supplies to support their research and school projects. The left-over, unused, and disposed-of materials are collected by Facilities and brought back out to the street where they are picked up by the city or our contracted haulers and transported to landfills, recycling or composting centers.

Over 70% of disposable bottles will end up in a landfill, stream, or ocean. The New School does not sell bottled water. New York City has some of the cleanest tap water in the country. Bring your own bottle and take advantage of FREE refilling stations all over the campus.

Personal sustainability means developing good self-care practices. Visit these spaces to rest, relax, or even squeeze in a power nap when your body needs to recharge.

The New School’s libraries, the Vera List Courtyard and Street Seats (summer only) are great places to sit, study, and observe.

University Center Library - 63 5th Avenue, Sixth Floor
List Center Library - 6 E 16th Street, 8th Floor
Performing Arts Library - 55 West 13th Street, 2nd Floor
Archives & Special Collections - 66 5th Avenue, Lobby Level

Building community is essential for achieving sustainability. There are many offices on campus that serve as resources for the New School community:

IT Central - 72 Fifth Avenue, Lower Level
Welcome Center - 72 Fifth Avenue, 1st Floor
Student Financial Services - 72 Fifth Avenue, 2nd floor
International Student and Scholar Services - 72 Fifth Avenue, 3rd floor
Office of Student Development and Activities - 72 Fifth Avenue, 4th floor
Athletics and Recreation - 72 Fifth Avenue, 4th floor
Student Support and Crisis Management - 72 Fifth Avenue, 4th floor
Student Health Services - 80 Fifth Avenue Avenue, 3rd Floor
Center for Student Success - University Center, 4th Floor
Food Pantry - 6 East 16th Street, 12th Floor

What additional sustainability features you would like to see on campus? Fill in the blanks with your ideas.

The Tishman Environment and Design Center (TEDC) is The New School’s university-wide hub for all things sustainability-related.

Since The New School divested from fossil fuels in early 2015, TEDC has worked to advance the culture of sustainability at the university by:

Investing in cutting-edge research led by students and faculty.

Providing opportunities for interdisciplinary collaboration beginning with TEDC-affiliated students and faculty from all five divisions of the university.

Creating exciting campus events including panel discussions, film screenings, and Earth Week celebrations.

Building our team and engaging with diverse community partners, practitioners, and experts to provide opportunities to work with local environmental justice and grassroots organizations on real-world solutions.

Collaborating with other departments on campus like Facilities management, Dining, and Student Housing and Residence Life to embed sustainability into the wholistic New School experience.

To get involved in sustainability at The New School:

Enroll in a TEDC-highlighted course: The New School offers many sustainability-related courses across a diverse array of disciplines. *For suggestions, visit our blog at www.blogs.newschool.edu/tedc.*

Join a sustainability organization: Meet other students interested in sustainability by joining student-led organizations like oikos NYC and Sustainable Cities Club, or start your own.

Participate in a TEDC event: Learn from students, faculty, and community leaders during one of our university-wide events.

Apply to become a TEDC Scholar: The TEDC Scholars program funds student projects that address critical environmental issues arising from the impacts of climate change and other environmental threats to community well-being and social justice. *For more information, go to bit.ly/TEDCScholars.*
