What is Five Borough Farm?

The New York State Department of Agriculture and Markets, in partnership with the New York City Department of Parks and Recreation, has created a plan for Five Borough Farm, the nation's first urban agriculture plan for the five boroughs.

Connecting green spaces, existing and new, to the city's food system, the plan will create a network of urban agriculture spaces, including community gardens, rooftop farms, and urban farms, and will support the growth of the urban agriculture industry.

This series of diagrams explains the plan and the process for creating Five Borough Farm, the nation's first urban agriculture plan for the five boroughs.

Urban agriculture is about more than food.

Urban agriculture is a growing trend in New York City and across the country. It is a way to connect people to their food, to the land, and to each other. It is a way to create a more sustainable and resilient city.

Five Borough Farm is a plan to create a network of urban agriculture spaces, including community gardens, rooftop farms, and urban farms, and will support the growth of the urban agriculture industry.

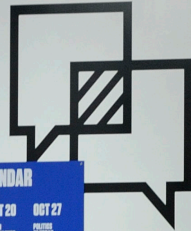

Urban agriculture is about more than food. It is about creating a more sustainable and resilient city. It is about connecting people to their food, to the land, and to each other. It is about creating a more sustainable and resilient city.

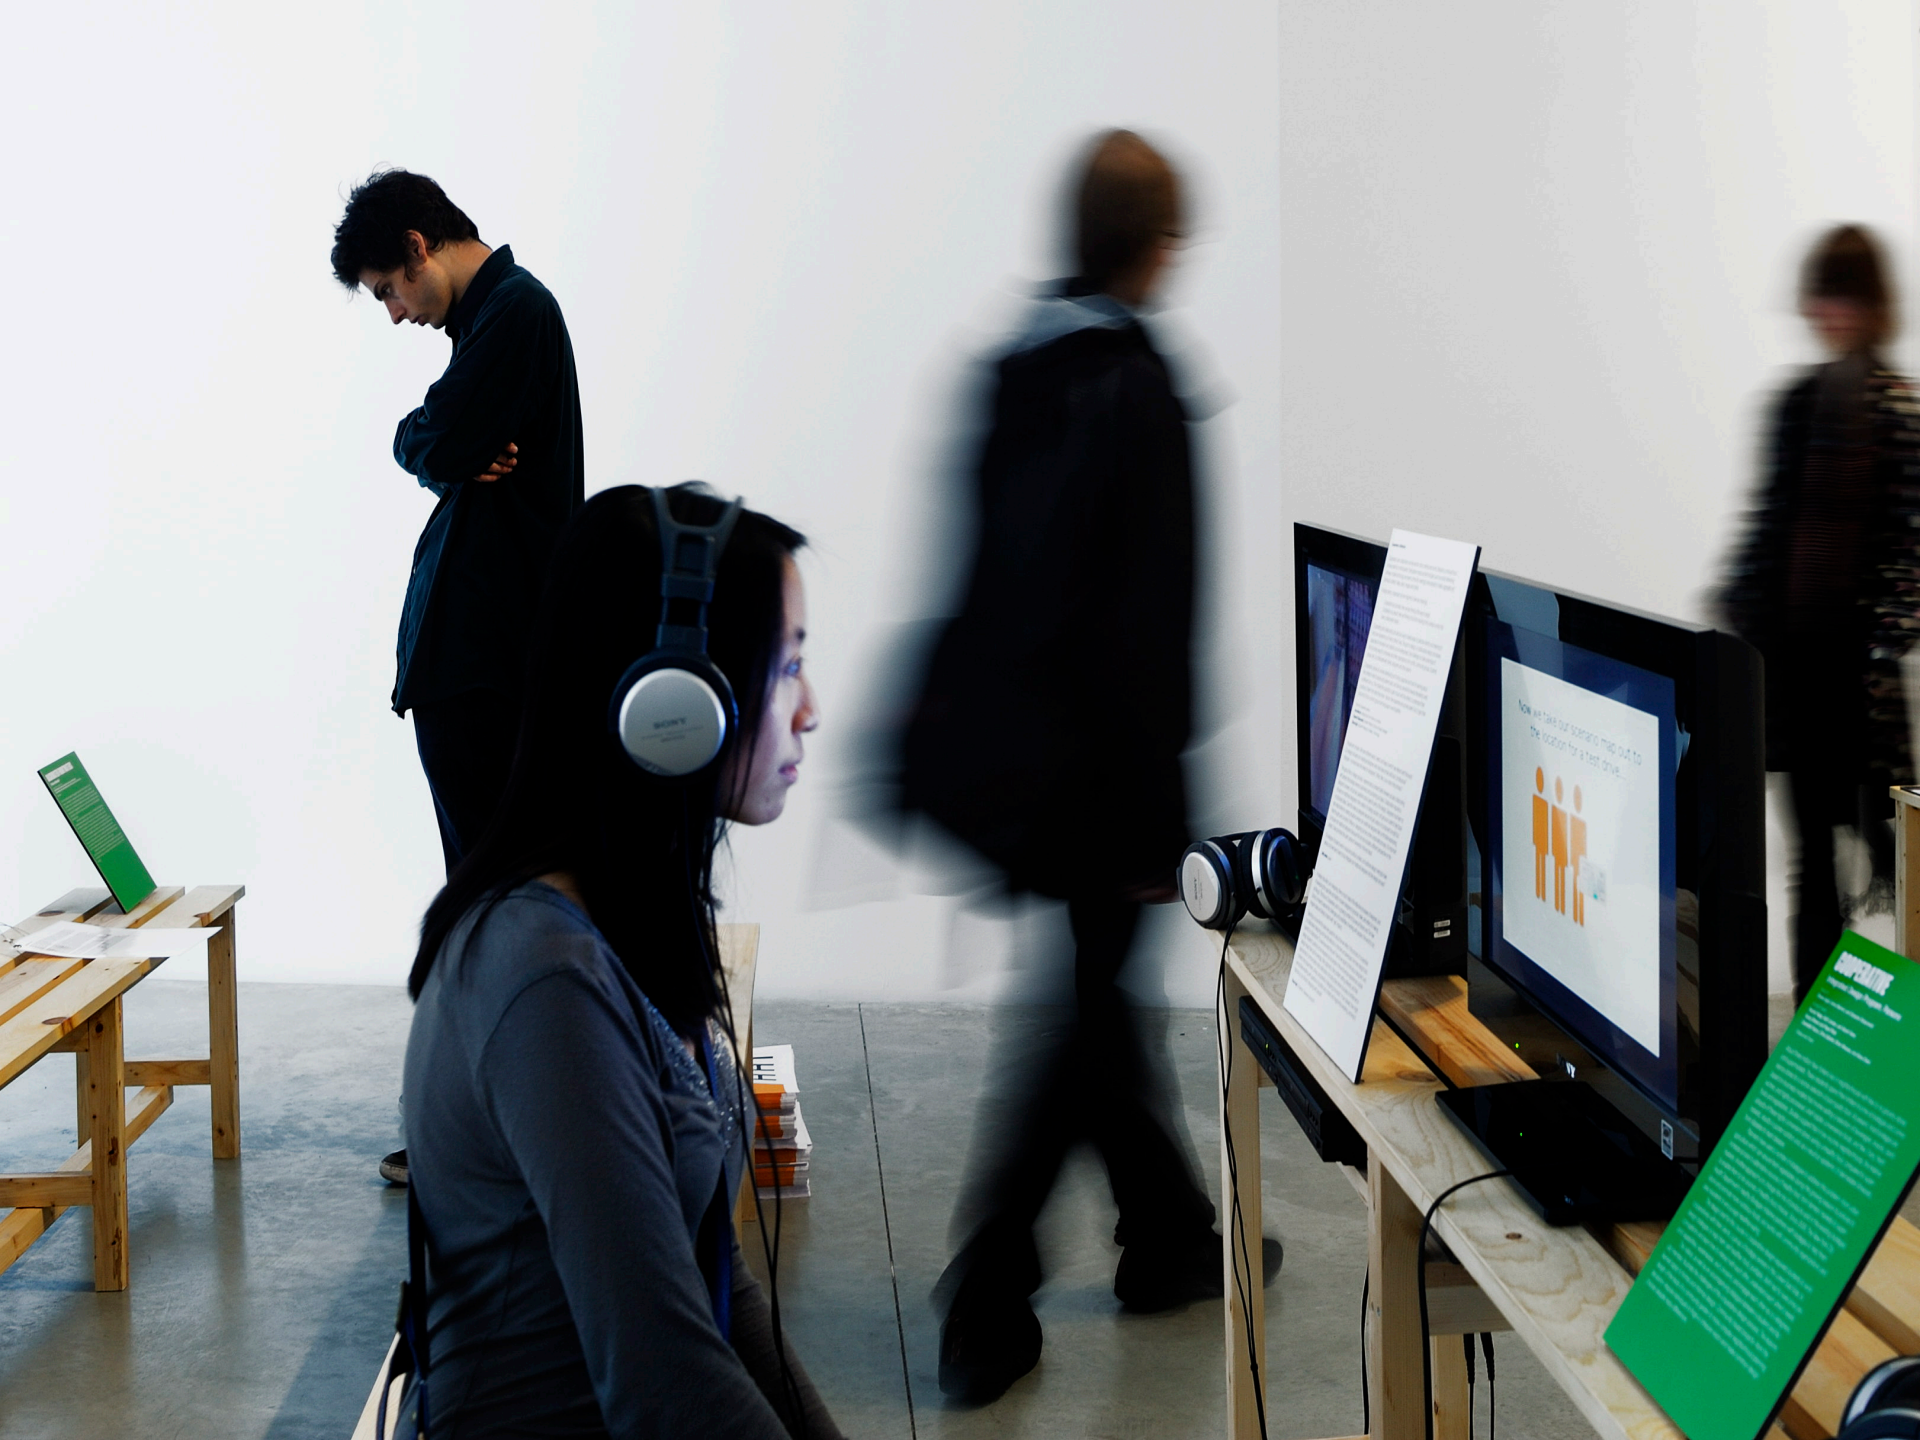

Below the icons are several small images of plants and vegetables: a green leafy plant, a purple eggplant, a red tomato, a yellow pepper, a green pepper, and a red pepper.
