IN-SIGHT® ELECT-R-MATIC HRT

Made of high-impact plastic and 20 gage CRS with a smoked transparent cover. Dispenser automatically advances a 12 inch towel when hand is placed under front of dispenser to activate the hand sensor. The user tears away the 12 inch towel and unit is ready for repeat use. The no-touch dispensing is designed to reduce the risk of cross-contamination because user only touches the product they use. Dispenses 8 inch diameter HRT roll of product. Features (4) standard D-size (LR-20) alkaline battery source for independent use with the option of an electrical adapter that fits the standard 110 outlet. Battery life is estimated for a 6 month cycle with a red indicator light on front of dispenser to indicate battery replacement. Features a cover lock with key for added security and all related instructions for mounting, loading and preparation. 1 per case.

Suggested Mounting height: 52"

NOTE: Unless otherwise noted, suggested mounting height is the distance from the floor to the bottom of the dispenser.
