

## Select Designated Pharmacy program

Providing you affordable options for high-cost medications.

Health care costs are always changing. Fortunately new medications are introduced each year, which may provide you lower cost options. We want you to have the information you need to make informed decisions and avoid paying too much.

The good news is that we have a program that can help. You can start taking a new, lower-cost medication to treat your condition from your local pharmacy. Or, you can continue on your current medication and start receiving it from the mail-order pharmacy.

### How the program works:

Program participants must choose one of three options to continue to receive network benefits.<sup>1</sup>

**1. Move to a lower-cost medication and save up to \$480<sup>2</sup> per year.**

There are often many medications that treat the same condition. Some are very expensive, but others are more affordable. Consider a lower-cost option, along with your doctor's advice.

**2. Use the mail-order pharmacy and save up to \$90<sup>2</sup> per year.**

If you want to keep taking your current medication, you can. Fill your prescription through the mail-order pharmacy and have a 90-day supply delivered to you.

**3. Do both and save up to \$500<sup>2</sup> per year.**

If you want the most savings, start using a lower-cost medication and the mail-order pharmacy. We'll contact your doctor on your behalf and take care of the legwork.

<sup>1</sup> Members on affected drugs who have non-network benefit coverage and choose to make no change will pay the full cost of the drug, and can file a paper claim for reimbursement as a non-network benefit. Members who do not have non-network benefit coverage and make no change will pay the full cost of the drug and cannot file a paper claim for reimbursement.

<sup>2</sup> Potential savings estimates do not take into consideration any deductibles or other expenses that may apply. Potential savings estimates are based on UnitedHealthcare typical benefit designs and are calculated based on an average 30-day supply for retail or a 90-day supply for mail order. Your actual savings may vary.

## Medications included in the program:

Condition	Medication	Lower-cost alternative
Anticonvulsant/Nerve pain	Lyrica	gabapentin
Asthma/COPD	Symbicort	Advair <sup>3</sup> , Alvesco, Asmanex, Dulera <sup>3</sup> , QVAR
