

# NEUE RANDOM

## THE OPENTYPE ALGORITHM

Neue consists of two 'Random' fonts:  
Neue Regular Random and Neue Black Random.  
These fonts can be installed on a PC or Mac.  
The OpenType algorithm allows the font to cycle  
through characters of various widths as you type.  
The following pages describe how to enable this  
feature if troubleshooting is needed.

## InDesign (Mac and PC)

---

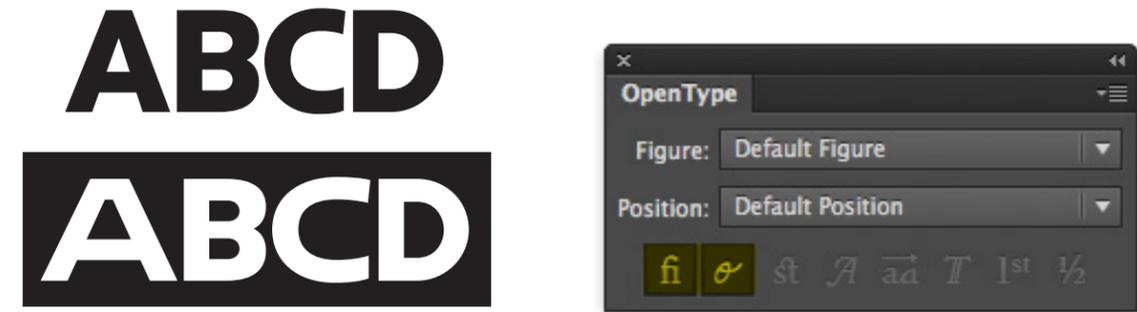

OpenType features **ARE** on by default.

If the features aren't working, make sure these are on:

- Ligatures
- Contextual Alternates

## Illustrator (Mac and PC)

---

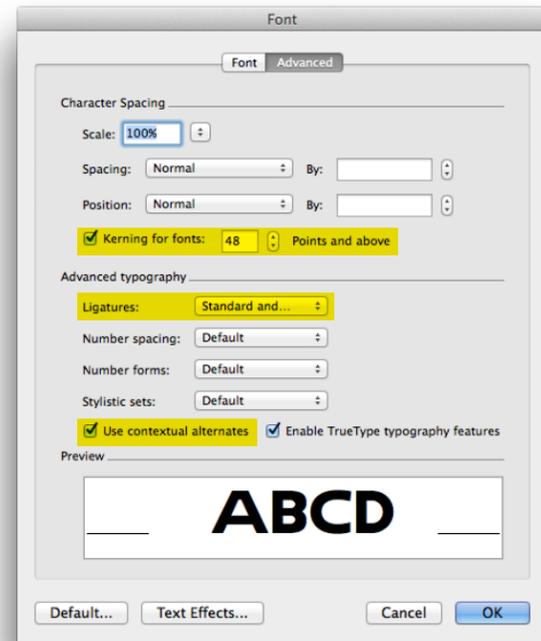

OpenType features **ARE** on by default.

If the features aren't working, make sure these are on:

- Ligatures
- Contextual Alternates

## Microsoft Word (Mac)

ABCD  
ABCD

OpenType features are **NOT** on by default.

You must turn on:

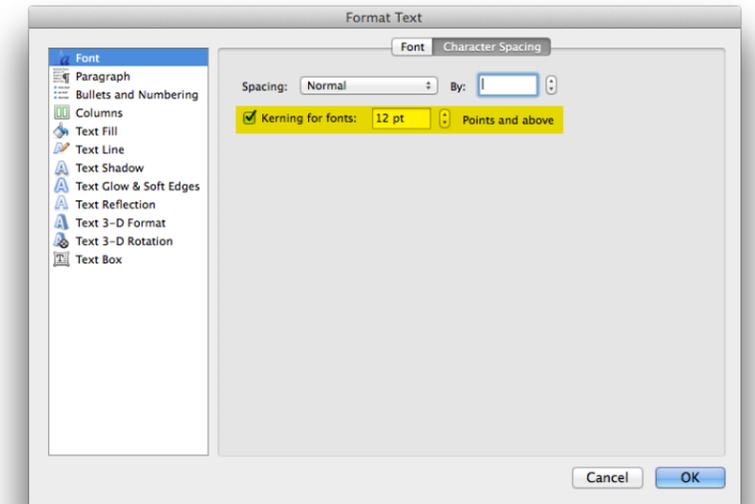

- Kerning
- Ligatures
- Contextual Alternates

Tip: Save these settings as 'Default', and you won't have to set them again.

## Powerpoint (Mac)

ABCD

Contextual Alternates and Ligatures **ARE** on by default.

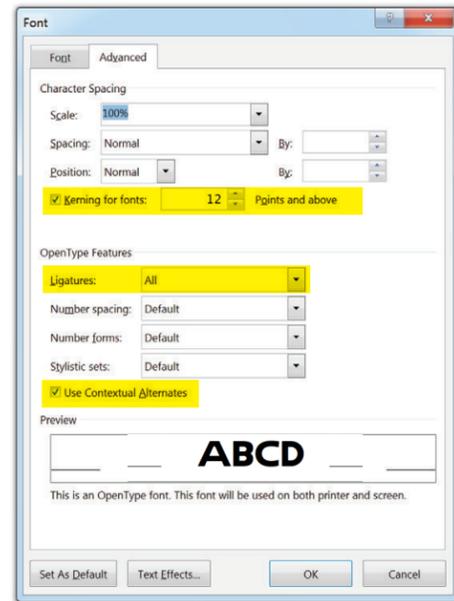

You must turn on:

- Kerning

## Microsoft Word (PC)

---

ABCD  
ABCD

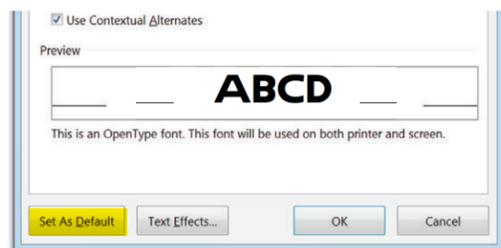

OpenType features are **NOT** on by default.

You must turn on:

- Kerning
- Ligatures
- Contextual Alternates
