This Student Handbook is a general reference to graduate study in this department. It includes information on academic programs, program requirements, teaching and research assistantships, and other matters related to your academic progress. It is designed to help your life as a graduate student proceed as smoothly as possible and to enable you to anticipate each stage in your graduate career.

The Student Handbook accompanies the NSSR Catalog. The Catalog is the official source of information about the rules, regulations and requirements of the University, the NSSR, and the Department. As a companion to the Catalog, this handbook is designed to clarify NSSR and Departmental policy, and provide you with resources for solving any problems that may arise as you pursue your graduate studies.

The information published here represents the plans of the New School for Social Research at the time of publication. The division reserves the right to change any matter contained in this publication, including but not limited to policies, degree programs, names of programs, course offerings, academic activities, academic requirements, faculty and administrators.

For further assistance, please contact the Department Student Advisor, the Department Secretary, or your faculty Advisor.
INTRODUCTION

The Department of Psychology of The New School for Social Research offers a program in General Psychology leading to the MA degree. The PhD Degree provides further study in Cognitive, Developmental, Social or Clinical Psychology. The curriculum stresses critical thinking about the major issues, phenomena, and applications of psychology. The faculty strives to educate and train practitioners who also can teach and engage in research careers.

This handbook serves as a guide to your studies in the MA program and beyond at NSSR and complements the general NSSR course catalogue. Students should consult with faculty, student advisors, office staff and/or the Office of Academic Affairs when they need clarification of policies or procedures. The information published here represents the plans of the New School for Social Research at the time of publication. The division reserves the right to change any matter contained in this publication, including but not limited to policies, degree programs, names of programs, course offerings, academic activities, academic requirements, faculty and administrators. However, you are held accountable for the procedures outlines in the handbook in the year in which you entered the program.

General Information

ADVICEMENT

The New School has specific offices to deal with most of the questions likely to be raised by graduate students in all departments: Student Financial Services, Registrar, and Admissions offices. For information specifically about the department’s programs the Student Advisors, and your Faculty Advisors can best assist you with any questions or concerns you may have. Additionally, you should consult the departmental bulletin boards regularly. This includes information regarding announcements of scientific and professional meetings being held at The New School and elsewhere in New York City, as well as research and training positions. There is also a student mailbox system. You can receive your box assignment from the Student Advisors, or check the list next to the mailboxes for your name, and be sure to check your box regularly.

Upon enrollment in the program all students must activate a New School email account when they arrive at the school in order to receive important NSSR related information, Departmental information, and be able to register online with the help of their student advisors. The university only recognizes New School accounts as ‘secure’ for the purposes of transmitting official information (such as transfer of credit forms). The Psychology Student Advising Office will periodically mail special information memos to all students. Please be certain to update your official address, email address, and/or telephone number through my.newschool.edu.

Student Advisors

Student Advisors are advanced students who assist with program planning and provide information about ongoing activities, events and opportunities in the department. They will assist students at registration and can also be consulted about such matters as oral and dissertation defense procedures and procedures for handling student grievances. (The Dean’s Office of Academic Affairs can also assist students with grievances or division-wide academic policy issues.) Currently, there are three departmental Student Advisors.
Advisors are generally available Monday through Friday at 80 Fifth Ave on the 7th floor (CSD advisor) and 6th Floor (Clinical Advisors). Please check [http://www.newschool.edu/nssr/subpage.aspx?id=82821](http://www.newschool.edu/nssr/subpage.aspx?id=82821) for their office hours each semester. Student Advisors may also be reached by telephone at (212)229-5727 at extensions 3107, 3109, and 3108. All MA students are assigned a student advisor. Though students are permitted to seek assistance from any of the three advisors, it is recommended that they first reach out to their assigned advisor who has in depth knowledge of the student’s record.

**Continuing PhD Students**

For PhD students, the dissertation chair also will serve as the student’s academic advisor. Clinical PhD students should notify the Student Advisor when a particular faculty member has been selected to serve as the advisor and/or dissertation chairperson. Students will be required to meet regularly with their faculty advisors to discuss their academic and training progress. Failure to attend the annual advisory meeting will prevent the student from registering for the upcoming semester.

**FINANCIAL AID**

Awards are made on the basis of financial need and academic merit. The FAFSA deadline for the following academic year should be filed with the Office of Student Financial Services no later than March 1st. The possible awards include college work-study, TAP grants, Perkins Loans (formerly NDSLs), tuition scholarships, and fellowships. All tuition scholarships and fellowship applications are submitted annually to NSSR Academic Affairs. All other questions about financial aid should be directed to Student Financial Services ([sfs@newschool.edu](mailto:sfs@newschool.edu)).

**Research and Teaching Assistantships / Fellowships**

The Department of Psychology offers financial assistance in the form of teaching and research assistantships, and teaching fellowships. The Office of Academic Affairs (located on the 10th floor of 6 East 16th Street) and/or Provost’s Office sends an e-mail to all students announcing these positions.

Interested students should complete the application and submit the requested materials online. In addition, students are expected to discuss the position applied for with the appropriate professor. These positions are available to students after having completed one year in the MA program.

**Teaching Assistants** are appointed to help professors with large classes, both at the graduate and undergraduate level. Most attend class meetings, are involved in discussion groups, are available for student consultation, and at the professor’s discretion, help grade examinations and/or papers. Teaching assistants are appointed by the professor responsible for the course. Check with the Dean’s Office for the current salary. One semester equals 15 weeks. Teaching assistants are expected to work a maximum of 10 hours per week.

**Research Assistants** directly assist faculty members with research. Duties generally include testing subjects, collecting data, statistical analysis, and manuscript writing. Research assistants are often chosen from among the students who have either worked for a particular professor under the college work-study program or as a volunteer. Interested students should
speak directly with the faculty member with whom they would like to work. Check with the Dean’s Office for the current salary. Full-time equals thirty-six weeks, approximately 10 hours per week.

Students who do not qualify for either work-study or teaching or research assistantships, or who do not have the time available to take such positions, are nevertheless encouraged to speak with individual faculty members about the possibility of participating in projects as volunteers. Such personal involvement in research is an essential aspect of graduate education in psychology. Faculty members are also available to discuss research possibilities.

**PSYCHOLOGY DEPARTMENT COLLOQUIA**

The Psychology Department offers lectures by prominent psychologists on research and clinical topics. The lectures are typically held at 12:30 p.m. on Wednesdays a few times during the academic year. The schedule for the year is posted on departmental bulletin boards and email reminders are sent out from the department Secretary.

**PROSEMINAR**

A Proseminar is held in the fall of each year. This class is a forum where faculty members describe the work they are doing, the research they are conducting, and how they became engaged in these projects. All new students are required to participate in this non-curricular, but rather important aspect of doctoral education (i.e., lab membership and conducting research).

This series of department presentations provides students with an opportunity to learn about the research undertaken by Psychology Department faculty and PhD students, as well as provides a forum for discussion of graduate study and professional opportunities. The general format is that each week different faculty members will present their recent research and answer questions. Some weeks there may be an additional presentation by faculty about professional lives pursued by psychologists: Ethics and Human Protection issues, publishing, academic careers, clinical practice, research careers, and other topics.
PSYCHOLOGY DEPARTMENT AND NSSR POLICIES

GRADING POLICY

Grades in courses are an important index of student learning and mastery of course content. Grades also help predict the likelihood of obtaining a doctoral degree. Graduate students are expected to maintain a much higher level of academic and scholarly achievement than undergraduates, and much more independent study and individual research is necessary. While students must maintain a minimum cumulative GPA of 3.0 to receive their MA, students must have a minimum GPA of 3.5 in order to apply for the Clinical Psychology PhD program, and a GPA of 3.7 to apply for the CSD PhD program (note: GPA does not round up/down, but is an exact number). To provide accurate feedback to students, faculty are expected to grade fairly and strictly.

Grades Awarded

A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), C- (1.7), F (0.0)

Pass-Fail

Doctoral students may take electives on a Pass-Fail basis with the approval of the instructor. In addition, any of the four seminars taken to fulfill the seminar requirement may be taken on a pass/fail basis. **M. A. level students are not allowed to take courses as Pass/Fail.**

Any PhD level student requesting to take a course on a Pass/Fail basis must first obtain permission from the instructor by completing a grade change form. Forms can be found outside either of the student advisement offices on the 6th and 7th floors. Return completed forms to a student advisor who will inform the Registrar to change the grade mode to Pass/Fail.

The following courses are automatically offered on a Pass-Fail basis:

- GPSY 6100 Proseminar
- GPSY 6134 Advanced Statistics
- GPSY 7002 and 7003 Diagnostic Testing I & II
- GPSY 7005 Diagnostic Interviewing
- GPSY 7006 Clinical Theory and Technique: Psychodynamic Therapy
- GPSY 7019 Clinical Theory and Technique: Cognitive Behavioral Therapy
- GPSY 7011 Professional Issues and Ethics
- GPSY 7012 Ethnicity in Clinical Theory and Practice
- GPSY 7009 and 7010 Clinical Psychology Externship Seminar I and II
- GPSY 7008 Clinical Supervision and Consultation
- GPSY 7018 Integrating Theory and Practice.

As a result, they do not require a formal petition for a Pass/Fail grade. If students would like to receive a grade for a course that is typically offered on a Pass-Fail basis, the student can petition for a change of grade mode in this case as well.
Incompletes

Incompletes are temporary grades indicating that the student has not yet completed the course requirements. This grade is given at the sole discretion of the instructor and must be explicitly requested by the student. Taking an incomplete requires that this is resolved within one year of the course and otherwise will result in a permanent incomplete (N). The student may retake a course for which a permanent incomplete (N) has been recorded, but must re-register and pay full tuition for the course. All incompletes for clinical psychology doctoral students must be satisfied before applying for the psychology predoctoral internship.

Students must present a plan to complete the work to the instructor with whom the course was taken. Normally, completing the outstanding requirements will suffice to remove an incomplete. However, sometimes retaking the course is necessary. If retaking the course, the student must register the next time it is offered as an auditor (which currently costs $90 per credit). If the course is not offered again, special arrangements must be made with the original instructor if possible; otherwise, permission to substitute a related course may be requested from the department chair.

Note: A special policy (outlined below) exists for the following clinical skills courses:

1. Diagnostic Testing I & II (GPSY 7002/7003)
2. Diagnostic Interviewing (GPSY 7005)
4. Evidence-Based Treatment (GPSY 7013)

Because the clinical skills course sequence leads directly to an externship, it is essential that the student demonstrate both mastery of basic clinical skills and professionalism with regard to reliability, accuracy and timeliness of performance.

Therefore, no incompletes will be allowed in clinical courses. A student who has not completed the required assignments by the end of the semester will be given a tentative grade based on the work actually performed. If work already done is not at a satisfactory level, the student will not be permitted to attend any subsequent course for which the course in question is a prerequisite. All assignments for Diagnostic Testing I and Clinical Theory and Technique Psychodynamic Therapy must be completed by February 1st. Assignments for Evidence-Based Treatment should be completed by July 1st. Work for Diagnostic Testing II and Clinical Theory and Technique: Cognitive Behavioral Therapy should be completed by July 1st. Students who have not completed their assignments by these deadlines will not be allowed to continue in any subsequent course for which the course in question is a prerequisite. If all work for Diagnostic Testing II and Clinical Theory and Technique: Cognitive Behavioral Therapy is not completed by July 1st, the student will be held back from externship.

INDEPENDENT STUDY

Students at the MA level may register for three independent study credits if their schedule permits and all degree requirements are satisfied. Clinical Psychology PhD students must have approval from the Director of Clinical Training to take more than three credits of independent study over the course of their PhD training. CSD PhD students who wish to do additional
independent studies must obtain the permission of the department Chair. Independent Studies require instructor approval and should report all the relevant approvals and information to the student advisors so they can ensure the student properly registers and their student records are up-to-date.

**AUDITING**

Students must pay an auditing fee ($90 per credit) to attend courses if they are not registered for credit. Auditors are not allowed in Introduction to Statistics and Research Design or Research Methods.

**ACADEMIC CREDITS TAKEN OUTSIDE THE DEPARTMENT OF PSYCHOLOGY**

MA students may elect to take one three-credit course in another department in the NSSR or two three-credit courses, if one of them is cross-listed under psychology in the NSSR Catalog. Doctoral students may elect to take up to 12 credits in departments of the NSSR other than Psychology. Students admitted to the PhD Programs may also take courses in other graduate schools that are part of the Inter-University Consortium. Information regarding the Consortium can be obtained online (http://www.newschool.edu/nssr/inter-university-doctoral-consortium/), or in the Office of Academic Affairs. Students should see staff in that office as soon as they have any interest in the consortium.
MASTER OF ARTS IN GENERAL PSYCHOLOGY

Note: Full-time graduate students register for approximately nine credits per semester and therefore complete the MA program one half to two years. Students who wish to take more than three courses in a semester must obtain permission from the department chair and Assistant Dean of Academic Affairs. Please note that students requesting to take more than 3 courses in a given semester should have a minimum GPA of 3.7. Courses are typically offered once per year, either in the fall, spring, or summer term.

All students must meet the following requirements:

1. A GPA of at least a B (3.0).

2. Students may register for a maximum of 30 credits before petitioning for the MA degree. Students must take 30 credits distributed as follows (see also the NSSR Catalog):
   a. There are seven required courses (3 credits each), which span the main sub-disciplines of psychology:
      i. GPSY 6101 Introduction to Cognitive Neuroscience
      ii. Cognitive Psychology (can be satisfied by GPSY 5110 Introduction to Cognitive Psychology, GPSY 5102 Visual Perception and Cognition, GPSY 6107 Language and Thought, or GPSY 6427 Language and the Brain)
      iii. GPSY 5120 Social Psychology
      iv. Developmental Psychology (can be satisfied by GPSY 6155 Developmental Psychology or GPSY 6281 Development and Psychopathology)
      v. GPSY 5155 Adult Psychopathology
      vi. GPSY 6133 Introduction to Statistics and Research Design (unless student is on the Substance Abuse track only)
      vii. GPSY 6238 Research Methods (Students wishing to pursue the Clinical Psychology doctoral program must take this course. The following students are not required to take this course; Students that are on the Substance Abuse track and do not intend to apply to the clinical PhD, and/or students in the Research MA program that plan to apply to CSD PhD program)
   
   b. This leaves nine elective credits needed to reach the 30 required, of which three credits may be taken in a NSSR department other than Psychology.

3. Over the course of the MA program, students are required to accumulate four hours of research participation credits. This can be fulfilled either by participating in hour-long experiments conducted by psychology department faculty and graduate students or by attending departmental colloquia. This is a mandatory requirement for receiving the MA degree.

4. All students are required to complete the departmental Proseminar, offered without charge during the fall semester. Each week different faculty members present their research interests; by the end of the semester students will have been exposed to the full range of possible research mentors.
CONCENTRATION IN MENTAL HEALTH AND SUBSTANCE ABUSE COUNSELING (CMHSAC)

Master’s level students can elect to pursue a course of study that will provide both practical and theoretical training in mental health and substance abuse counseling. Practical training is available at several sites in the New York City area.

However, students will not receive clinical placements until they have taken Adult Psychopathology, Psychopathology 3, and the Introduction to Substance Abuse Counseling course in addition to being given formal approval by the director of the concentration. Students in the CMHSAC have the option of completing the academic requirements for trainee certification as an alcohol and substance abuse counselor (CASAC). MA students on this track are still eligible to apply to either the Clinical or CSD PhD program, although those interested in either program will likely need to take one course beyond the 30-credit maximum. For more detailed information please consult the CMHSAC Handbook (available at Student Advisors’ office) or the CMHSAC website at: http://www.newschool.edu/nssr/ma-concentration-substance-abuse-counseling/

Doctoral students in the clinical program are invited and encouraged to take courses within the Concentration in Mental Health and Substance Abuse Counseling (CMHSAC) to gain additional training in working with clients with substance use disorders if they did not take them during the MA Program.

Students wishing to earn the MA in General Psychology with a Concentration in Mental Health and Substance Abuse Counseling must take the following courses:

1. GPSY 6109 Introduction to Substance Abuse Counseling
2. GPSY 6112 Advanced Issues in Substance Abuse Counseling
3. GPSY 6101 Introduction to Cognitive Neuroscience
4. Cognitive Psychology (can be satisfied by GPSY 5110 Introduction to Cognitive Psychology, GPSY 5102 Visual Perception and Cognition, GPSY 6107 Language and Thought, or GPSY 6427 Language and the Brain)
5. GPSY 5120 Social Psychology
6. GPSY 5155 Adult Psychopathology
7. GPSY 6156 Psychopathology III: Biosocial and Cognitive Theories of Addiction
8. GPSY 6100 Proseminar
9. GPSY 7011 Professional Issues and Ethics
10. 3 additional elective courses (9 credits)

Students who intend to apply to the Clinical Psychology PhD program must also take:

- GPSY 6238 Research Methods
- GPSY 6133 Introduction to Statistics and Research Design
- 1 additional elective OR Developmental Psychology (can be satisfied by GPSY 6155 Developmental Psychology or GPSY 6281 Development and Psychopathology, which is strongly recommended)
MASTER OF ARTS (GENERAL PSYCHOLOGY WITH A RESEARCH EMPHASIS)

Research Master’s Admission Requirements

This option is required for students that wish to apply to either PhD program. Students are admitted to the Research Master’s program by application after their first year of the MA program. Information and applications are available from the Student Advisors. Students must submit a copy of the following after completing at least 18 credits and prior to their final semester before graduating from the MA program:

1. For MA students working with a CSD faculty mentor and planning to apply to the CSD PhD program, evidence of a 3.7 (A-) grade point average at the end of the semester in which 18 credits of coursework are completed at the NSSR (or very close to a 3.7 and the permission of the potential faculty supervisor and appropriate department chair to apply). For students working with a Clinical faculty mentor and planning to apply to the Clinical PhD program, a minimum grade point average of 3.5 is required to apply to the Research Master’s track. These credits must include six of the required MA courses, including Introduction to Statistics and Research Design.

2. A brief description of the proposed research for the MA thesis.

3. A MA thesis application signed by the faculty sponsor, a student advisor, and the department chair.

Research Master’s Degree Requirements

1. A research thesis conducted under the supervision of a member of the department. The thesis will be examined and evaluated by the supervisor and one other member of the department. The evaluation consists of a pass/fail grade agreed upon by the two faculty.

2. All other requirements for the MA degree.

The thesis must be completed within eighteen months of admission into the Research Master’s program. Students accepted into the Clinical Psychology PhD program must present a satisfactory progress report to the Director of Clinical Student Affairs prior to the end of their final semester in the MA program in order to be eligible for final admission. Please note that registration will be put on hold if students have not completed their MA thesis in the allotted time. Clinical students must successfully defend their master’s theses no later than the close of the spring semester of the first year in the clinical PhD program.

Students opting for the Research Master’s track are encouraged to find a faculty advisor during their first year of study who is willing to supervise research. The sooner the student begins a working relationship with a faculty member, the easier it will be to complete the MA thesis in a timely fashion. Students initially opting for the Research Master’s may switch to the other MA option prior to admission to the PhD program.

An application to the Research Master’s track should be made after completion of the first 18 credits, but absolutely MUST be completed prior to the start of the final semester in the MA program.
CONTINUED STUDY

Students who are completing requirements for the MA in Psychology at The New School and who want to continue toward the CSD or Clinical PhD must submit applications to each program (a student may apply to both). No more than 30 credits may be taken prior to applying to the PhD programs (unless student is on Substance Abuse track, in which case no more than 31 credits are permitted). See pp 17 and 21-22 for specific GPA and other eligibility requirements, and meet with Student Advisors for further details. The CSD PhD program is 60 credits and the Clinical PhD is 90 credits.

Students who have completed MA program requirements at The New School and who are admitted to the PhD programs should petition to graduate during the semester in which they intend to complete all MA program requirements.

Students who are not admitted to PhD programs cannot take graduate psychology classes beyond the 30 credits for the MA. If non-PhD students confer their MA, they will not be able to register for more classes because they will cease to be matriculated at the NSSR. If such students wish to take courses as a non-matriculated student, they must register by contacting the Admissions office.

ADVANCED STANDING

Students with an MA in Psychology from another graduate program who wish to enter either the CSD or Clinical PhD program are not automatically admitted to those programs, but they may be given advanced MA standing in a limited number of cases at the discretion of the admission committee and the department in the Psychology Department. Students with previous Masters degrees in social work, counseling, or mental health counseling are often not eligible; however, many of these students tend to be very successful and are often accepted into the PhD program after completion of the MA. Advanced standing students are not eligible for an MA degree from The New School upon completion of stipulated courses. In order to be admitted to the PhD programs, these students must:

1. Take at least 12 credits of coursework at The New School (possibly more depending on transfer credits). A typical course load might consist of four required MA courses. Students who do not have extensive experience in independent experimental research are advised to take the Research Methods course, in which students design, carry out and write up a pilot experiment. This is particularly important if the student does not opt for the Research MA Program. Students should consult with the Student Advisors to make sure that their courses, in combination with the transfer credits, allow their full eligibility for applying to the PhD programs.

Students interested in applying to the Clinical Psychology PhD program should consult pages 26-29 to make sure their pre-PhD course of study will lead to their ultimately satisfying New York State licensure requirements. New York State licensing requirements can be found on the Office of Professions Psychology page http://www.op.nysed.gov/prof/psych/psychlic.htm. In order for students to complete the Clinical PhD program in a timely manner, students should have taken GPSY 5155 Adult
Psychopathology and GPSY 5120 Social Psychology (or have equivalent courses transferred) at the pre-PhD level.

2. Maintain the required GPA (3.5 for Clinical, 3.7 for CSD) in these 12 credits in order to be eligible to apply to either the CSD or Clinical PhD programs.

3. Fill out formal applications to either (or both) PhD programs. Applications include an essay explaining research and professional plans; selection of faculty research mentors; all Non-New School transcripts from both undergraduate (and graduate, if applicable) institutions; and a curriculum vita. For clinical applicants, letters of recommendation are optional. The clinical program will request feedback from NSSR faculty members so that students can be assured that such feedback will be considered during the admissions process. Eligible students complete both a program application for consideration of acceptance into a specific PhD program, as well as a graduate admissions application to initiate pursuit of ongoing student status at the doctoral level. Program applications are available from each psychology program and graduate admissions applications are available from the Office of Graduate Admissions.

4. Students applying to the clinical PhD program must participate in two interviews with clinical faculty members (for further information refer to page 21).

Note: Students are not eligible to receive an MA degree in psychology at The New School, unless they have successfully completed at least 27 credits total in our MA program.

TRANSFER OF CREDIT

Upon completion of 6 credits at the NSSR with a cumulative GPA of at least 3.3, students may transfer up to three credits toward the MA. A maximum of 30 transfer credits is allowed toward the PhD degree, including any credits granted toward the MA. Students can petition to transfer additional credits after acceptance into the PhD program.

For all students, transfer credit is granted according to the following guidelines:

1. The course must be either equivalent to a course listed in the NSSR Catalog or must clearly fall within one of the fields represented in the department. **No transfer credit will be awarded for clinical skills courses during the MA program.**

2. The student has not taken an equivalent course at the NSSR (i.e., credit will not be granted for the same course twice).

3. The course must have been taken within the last ten years.

4. Transfer credit will be denied if the course grade is below a B.

As noted above, students entering with an MA in General Psychology may be awarded Advanced MA status, depending on the number of likely transfer credits. This status is awarded at the discretion of the admission committee and the department chair and reserved for students who have performed extremely well in their previous studies. Students who are admitted with Advanced MA status are not guaranteed a place in the PhD program. These
students must meet with a Student Advisor at the time of admission to fill out a transfer credit worksheet.

Transferring credits can be petitioned for via an online petition.

**MA TIME LIMITS AND EXTENSIONS**

All 30 of the course credits for the MA degree must be earned within five years of the date of matriculation. If a student is not able to meet this time limit, an extension of time may be requested, but is not guaranteed.

Petition forms for extensions are available via an online form.

**MISCELLANEOUS**

*Psychology Student Government*

The Psychology Student Government (PSG) is the student-led governing body that serves as a channel between students, faculty, and the administration. The PSG represents the views of all graduate students in the NSSR psychology department. The PSG meets once a month on Thursday from 4-5:50PM and determines concrete actions that students can collectively pursue (e.g., working groups to investigate departmental matters, how PSG funds should be allocated, in-person and digital voting, etc.). There are three officers (i.e., facilitator, treasurer, & secretary) and a representative for each graduate program (i.e., MA, CSD, & Clinical). Participation and attendance is highly encouraged, and desired. To reach out with any questions, concerns, feedback, or ask to have an item put on the upcoming meeting agenda, please email psychstudentgov@newschool.edu

*Clinical Student Faculty Meetings*

Clinical faculty and students will meet twice a month on Thursdays from 4-5:50PM. The schedule will be sent out from the department secretaries. The format and focus of these meetings is to discuss any changes, areas of concern, or other topics relevant to student life and department culture.

*Clinical Faculty Meetings*

Clinical faculty meetings (Wednesdays from 11-12:30) will be open to all students to ensure transparency and fairness in faculty decisions. At certain points students may be asked to leave the room to respect student privacy.

*Psychology Student Collective (PSC)*

The PSC is a student organization that provides both a social milieu and a forum for psychology students’ concerns. Led by an executive committee, the Psych Collective maintains a regular channel of communication between the student body and the faculty to assure student input into educational and administrative decisions. There are two voting representatives who take on the responsibility of attending all departmental faculty meetings and participate in the forming and carrying out of academic policies.

These students are elected once a year at Psychology Collective meetings in the spring.
The PSC sponsors a colloquium series and holds several social events for Department of Psychology students, faculty and staff throughout the academic year. Standing committees organize activities and new students are welcome to join.

The Colloquium Committee of the PSC presents a formal lecture series by distinguished psychologists. The Committee selects speakers who represent diverse positions in both academic and professional psychology. A small dinner for committee members, students, The New School faculty and guest speakers precedes each lecture.
PHD IN COGNITIVE, SOCIAL AND DEVELOPMENTAL (CSD) PSYCHOLOGY

NATURE OF THE PROGRAM

The cognitive, social, and developmental program emphasizes the role context plays in shaping cognition and behavior, focusing on social factors, culture, the body, and the situation. This contextual approach provides a framework for understanding psychological theories and other biologically based perspectives on mental and emotional activity. Overall, the research conducted in the program reflects a broad-based perspective and supports diverse methodological approaches and interdisciplinary work. All students complete the concentration in General Psychology at the Master’s level. Here students gain a foundation in cognitive, social, and developmental psychology through completing core courses offered in each of these areas.

At the doctoral level, each student concentrates in either cognitive, social, or developmental psychology through specialized seminars and independent study with members of the faculty who share the student’s interests. If eligible, students may take relevant courses offered by other universities through the Inter-University Consortium. (Consult with a Student Advisor and contact the Coordinator of Academic Affairs for more information regarding registering for IUDC).

The doctoral program uses an apprenticeship model—a student works closely with a member of the faculty on collaborative research projects and developing a dissertation. Students are expected to become members of lab groups and to attend and present their own research at seminars and conferences.

EVALUATION AND ADMISSION REQUIREMENTS

Students matriculated in the Master’s program at The New School for Social Research must complete the distribution requirements for the MA degree and must formally apply to continue study toward the PhD.

Students must successfully complete the Research Master’s Thesis.

Applications are available in the fall semester and are due February 1st to be considered for financial aid.

All students applying must have a minimum 3.7 GPA on NSSR MA coursework at the time of application, and have been accepted into the Research MA program. Students must maintain a 3.7 in their final semester, and throughout the completion of the Research MA thesis. Applications include an essay in which students describe their research plans and professional goals, in as much detail as possible, emphasizing the student’s fit with the NSSR Psychology department. Applications are more likely to be successful if students have already embarked upon a program of research with a faculty member.

Students are informed of the outcome of the faculty’s discussion of the application. Students are told either that (1) they will be admitted to the program as long as they pass the Research Master’s thesis, or (2) that they will not be admitted to the program.
COURSE SELECTION AND DEGREE REQUIREMENTS FOR THE PHD IN COGNITIVE, SOCIAL AND DEVELOPMENTAL (CSD) PSYCHOLOGY

At the MA Level

- GPSY 6100 Proseminar
- The 7 required courses
- The 9 additional elective credits (three 3-credit courses in psychology)

At the PhD Level

- GPSY 6134 Advanced Statistics
- Four three-credit seminars (including seminars taken at the MA level)

Summary of Degree Requirements

- 60 credits (including 30 MA credits)
- Completion within 10 year time limit (including the MA degree)
- 3.7 GPA
- Maximum of 30 credits can be transferred
- GPSY 6134 Advanced Statistics
- 4 three-credit seminars
- One semester (three credits) of GPSY 6990 Independent Study with PhD faculty advisor
- Dissertation Proposal Defense
- Dissertation
PHD IN CLINICAL PSYCHOLOGY

NATURE OF THE PROGRAM

The Clinical PhD program is accredited by the Commission on Accreditation of the American Psychological Association. Questions related to the program’s accredited status should be directed to Commission on Accreditation:

Office of Program Consultation and Accreditation
American Psychological Association
750 First St. NE Washington, D. C. 20002-4242
Phone: (202) 336-5979
E-mail: apaaccred@apa.org
Web: www.apa.org/ed/accreditation

The program is integrated into the mission of the university as a whole, which values progressive social thinking, and the mission of The New School for Social Research (the NSSR), which values critical thinking, pluralism, diversity, and interdisciplinary dialogue. Our training philosophy is consistent with the scientist-practitioner model of clinical psychology. In following this model our philosophy is in line with the values of the NSSR, which emphasizes the importance of pursuing and maintaining integration between scholarship and real world concerns. The program also places a strong value on respect for and understanding of cultural and individual diversity.

Following the scientist-practitioner model of training for clinical psychology, we are committed to teaching our students to integrate research and practice in a meaningful way. We teach them to view the activities of conducting research and engaging in clinical practice as mutually enhancing in nature - to understand that clinical practice generates important questions and insights that can have a valuable influence on the conceptualization and execution of research; and that both research findings and the process of conducting research can have an important impact on clinical practice. Consistent with the Gainesville conference on scientist-practitioner education, the emphasis in our training model is on the integration of science and practice in all activities a clinical psychologist undertakes. From this perspective the hallmark of the scientist-practitioner model is thus not just publishing in scientific journals, but rather bringing the integrative perspective of the scientific-practitioner model to all professional activities. Many of our graduates choose to work in clinical settings, and when they do so we expect them to approach their work with the critical sensibility that is the hallmark of science, to value and seek out up-to-date information, including expertise in both clinical techniques and empirical findings regarding assessment, psychopathology and therapeutic methods, and to evaluate this information critically. When they do research we expect them to be attuned to real world clinical concerns, and to use their clinical experience to generate meaningful hypotheses.

We also believe it is important for students, from the outset, to struggle with the fact that the practice of clinical psychology often falls short of the ideals of the scientist-practitioner model, and that there is an increasing recognition in the field that there is often a gap between researchers and clinicians. Research can fail to take into account the realities of real world clinical practice, and as surveys indicate, many practitioners are uninterested in research findings. An important goal is thus to train students to think critically about the factors leading
to the researcher/practitioner gap and to explore various ways of reducing it. We attempt to create an atmosphere in which critical spirit will flourish. Ongoing questioning and dialogue are encouraged, formally and informally, not only in class and seminar rooms, but also at guest lectures, case conferences, research conferences and various faculty and student meetings.

In its clinical training, the program is pluralistic, with an emphasis on psychoanalytically informed practice. The psychoanalytic legacy of our program hearkens back to the origins of the NSSR during World War II, when a number of the founding members were interested in the synthesis of social and political thought, psychoanalysis and the humanities. Many of our basic clinical skills courses have a broadly based psychodynamic emphasis. Others have a cognitive-behavioral emphasis. Students are also exposed to other therapeutic orientations (e.g., humanistic, existential approaches, multicultural). They are encouraged to approach clinical practice with an open, inquiring mind and an absence of doctrinarianism.

Critical inquiry and debate are encouraged and students are encouraged to seek out training experiences in a range of different orientations during externship placements. Our faculty represents a range of different theoretical viewpoints. Students are exposed to diverse orientations, and taught to examine similarities, differences and points of complementarity between them. They are taught to think critically about the strengths and weaknesses of different approaches and to explore different approaches to integrating both interventions and theories from different perspectives (e.g., technical eclecticism, theoretical integration, common factors approaches, and assimilative integration).

To summarize, our training philosophy emphasizes the importance of 1) integrating theory, research and practice in a meaningful way; 2) developing a solid grounding in the breadth of scientific psychology and learning to integrate this knowledge with both research and practice in clinical psychology; 3) developing attitudes necessary for lifelong learning, critical thinking and an ongoing ability to grow and develop as professionals in the field; 4) developing the requisite skills for entry into professional practice; and 5) developing an appreciation and respect for the values of diversity and pluralism (cultural, ethnic, theoretical and methodological).

Students begin their studies toward the PhD by obtaining an MA in General Psychology, which includes courses in psychopathology and foundations in research and clinical judgment. Only after this can they apply to the Clinical Program. As part of their grounding in general psychology, students take courses in experimental psychology, human development, physiological psychology, statistics, social psychology and personality. The background in general psychology and research design acquired during the MA portion of the program provides a baseline of “normal” psychological processes to support the study of clinical disturbances, distortions and deviations in cognition, perception, emotion and social behavior. It also provides a research perspective toward clinical work that will be applied when designing research projects and doing dissertation research.

**IMPORTANT DEADLINES**

Students applying to or enrolled in the Clinical Program should be aware of several important annual events and deadlines. Below is a partial list:
1. All students are required to attend the Proseminar—held in the first Fall Term, in order to familiarize themselves with clinical faculty members’ research.

2. In consultation with the faculty advisor, students are expected to finish the Research Master’s Thesis eighteen months from the date of acceptance into the Research Master’s track. Students are strongly encouraged to complete their theses as early in the program as possible in light of various clinical and academic responsibilities that begin the first semester in the program. The final deadline for clinical students to complete this requirement is the close of the spring semester of their first year in the clinical PhD program.

3. Applications to the Clinical PhD program are available from the Director of Clinical Student Affairs in November each year and are due February 1st. The Clinical Admissions Interviews are held in February and March.

4. The Director of Clinical Student Affairs and student advisors will e-mail and/or mail specific program requirement, evaluation and event information to clinical students. Please be certain to notify the program of any changes in mailing address, e-mail address or telephone number. Students must also complete a Change of Address form via my.newschool.edu.

PROGRAM OUTLINE

Acceptance into the program begins a process of combined clinical training and evaluation. To provide clinical services in an effective and ethical way, the student must master a range of clinical skills. The core of the Clinical Program is the study of psychopathology, psychotherapy and assessment, from both clinical and research perspectives. A sequence of courses on diagnostic assessment includes theory and technique as well as standardized methods of personality assessment, diagnostic testing for children and adults, and neuropsychological testing. A variety of modes of intervention for treatment and prevention are taught.

Assessment courses have laboratory sections as well as practica arranged through affiliated clinical agencies when possible. The program has established affiliations with hospitals, social agencies, clinics and mental health centers at which students engage in required externship training. The Assistant Director of Clinical Training and the Director of The New School Psychotherapy Program serve as agency liaisons for clinical students.

EVALUATION AND ADMISSION REQUIREMENTS

To be considered for admission to the Clinical PhD Program, students must satisfy the following requirements:

1. A minimum 3.50 grade point average in The New School’s General Psychology General Master’s program [Research Master’s Track] at the time of application and the maintenance of a 3.50 GPA until completion of all MA requirements. This is necessary to maintain eligibility to begin the clinical program.

2. Judgment by two members of the clinical faculty, based on independent admissions interviews and written application materials, that a student is well suited for clinical
work. The entire clinical faculty meets to discuss admissions decisions, and input from faculty who know applicants in other contexts (e.g., through research mentorship) is considered, along with the recommendations of interviewers.

3. Each applicant to the Clinical Program will be required to nominate and rank, in order of preference, two members of the regular (i.e., non-adjunct) clinical and/or CSD faculty with whom they would like to pursue doctoral research. Students should speak with the faculty member they intend to nominate before doing so. Adjunct faculty cannot be included among those nominated. During the clinical admissions process, input will be sought from all members of the psychology department faculty regarding each applicant’s research prospects and general fitness to pursue the clinical doctorate. Note that matches between student interests and faculty research will be a factor in admissions.

4. All applicants must write an essay, approximately 2 to 3 typewritten pages, addressing: 1) their educational background, 2) research and clinical experience, 3) a research question or set of questions that they are interested in pursuing in the PhD program, 4) immediate and long-term goals, and 5) life experiences which might supplement traditional criteria (e.g., test scores, GPA) to demonstrate their academic promise. In describing research interests, students should bear in mind that the department is not asking for a fully developed research proposal or a firm commitment to pursue a particular area. Rather, the faculty seeks to gain an understanding of the questions or problems that currently draw an applicant to the field of clinical psychology, with full recognition that this may change over time.

5. Prospective applicants to the Clinical Program are strongly encouraged to become involved with a faculty members research, or to discuss their own research interests with faculty, before applying to the Clinical Program.

The department reserves the right at the time of application, with the applicant’s consent, to access and review all university academic and disciplinary files.

Successful completion of the MA in General Psychology does not guarantee admission to the PhD program. The Clinical Psychology PhD Program admits approximately 15 students per year.

**CLINICAL ADMISSIONS INTERVIEW**

Applicants to the Clinical Psychology PhD Program will interview with two clinical faculty members during the spring semester of the year in which they obtain their MA degree from The New School. During this interview students will be evaluated along a number of dimensions relevant to clinical training including interpersonal skills and emotional maturity. Students should expect to have personal matters explored during the interviews. Interviews will also explore students’ potential research interests and assess their ability to think about empirical issues in a critical fashion. Following the completion and submission of the Clinical program application, candidates will be notified by the Clinical Secretary of the interview dates and times. It is the student’s responsibility to confirm and attend these interviews. Hence if there is a scheduling conflict, the student will be responsible for contacting his or her assigned faculty interviewer to reschedule the meeting.
**CLINICAL ADMISSION NOTIFICATION**

Students will receive provisional notification regarding admission to the clinical program in the spring. At this time they will be notified either of: 1) provisional acceptance to the clinical program contingent upon their successful completion of MA requirements or 2) wait-list status, meaning that they will be admitted if there are sufficient openings after the initial acceptances are final, and are eligible to reapply to following year or 3) that they cannot be admitted; If a student is not admitted he/she/they will not be eligible to reapply to the program. If an applicant receives waitlist status and reapplies the following year, it is important to understand that he/she/they will need to complete a new application process, including providing updated application materials and participating in two independent interviews, and that their application will be considered alongside that year’s applicants. These ranking are made on the basis of all information available (e.g., academic performance, input from all faculty who know the student, admissions interviews, previous experience, GPA, etc.).

**ADDITIONAL CONSIDERATIONS**

Students interested in admission to the Clinical Psychology PhD program are encouraged to acquire experience working in clinical service delivery or research settings. There are numerous opportunities to work in faculty research labs as well as gain access to clinical work through various faculty. Others may wish to consider securing volunteer positions in mental health service settings. Openings for student volunteers often come to the attention of the clinical faculty and the director of clinical student affairs. Notices are posted in the Clinical Psychology student lounge and lobby on the 6th floor of 80 Fifth Ave.

At the time of application for admission to the Clinical Psychology PhD program, the clinical faculty will review letters of recommendation written by those who have supervised the applicant’s volunteer work.

Students should not obtain letters of reference from members of the psychology faculty, since all members of the faculty provide verbal input during the admissions process.

Students are advised to begin working with faculty members in their research programs early at the MA level. Whether or not students already have a faculty mentor at the time of application to the clinical program is one factor considered during the admissions process.

**NON-MATRICULATED STUDENTS APPLYING WITH A PREVIOUS MA FROM THE NEW SCHOOL**

Students who hold a Master’s degree in psychology from NSSR at the time of application must apply directly to the Clinical Psychology PhD program for consideration by completing a Clinical Psychology PhD application. Applications are available in November from the Director of Clinical Student Affairs (80 Fifth Avenue, Room 601) and due by 6 P.M. on February 1st. Students must apply both to the Clinical PhD program for consideration and to Graduate Admissions to initiate student status.
STUDENTS APPLYING WITH ADVANCED STANDING STATUS

Students applying to the Clinical Psychology PhD program who have been granted Advanced MA status must, at minimum, take the following courses unless they are specifically exempted from doing so:

- GPSY 6101 Introduction to Cognitive Neuroscience
- GPSY 5110 Introduction to Cognitive Psychology, GPSY 5102 Visual Perception and Cognition, or GPSY 6107 Language and Thought
- GPSY 5155 Adult Psychopathology
- GPSY 5120 Social Psychology or GPSY 6155 Developmental Psychology/GPSY 6281 Development and Psychopathology
- GPSY 6100 Proseminar

Note: It is important that students entering the MA program with approved advanced standing status understand they are not being admitted directly into the PhD program in Clinical Psychology.

Students are eligible to apply for admittance to the Clinical Psychology doctoral program after having successfully completed the above coursework, and having met and maintained the minimum 3.50 GPA requirement throughout the program.

Students who believe they have completed a required course equivalent at another institution must meet with the Student Advisors prior to registration to fill out a transfer of credit worksheet for review.

CLINICAL COURSE SELECTION AND DEGREE REQUIREMENTS

Coursework

Students admitted to the Clinical PhD Program must complete a total of 90 credits of coursework in academic psychology and clinical practice.

The 90-credit program leading to a PhD in Clinical Psychology is completed in two stages. The first 30 credits lead to the MA degree in General Psychology. The remaining 60 credits are required for completion of doctoral work.

Students in their first year of the Clinical Psychology PhD program are required to do practica at The New School-Psychotherapy Research Program (NSPRP) for which they may receive one credit for both Fall and Spring semesters. Second year students can receive one credit for continuing to see patients at the New School Psychotherapy Research Program (NSPRP) for both fall and spring semesters. Placements are available in subsequent years of the program as well and are coordinated through course instructors and through the NSPPP director.

Class Attendance Policy

The Clinical Psychology PhD program’s attendance policy requires that clinical doctoral students attend all class sessions. While it is understood that unavoidable and unexpected life circumstances can sometimes preclude perfect attendance, students are expected in such cases
to communicate with the relevant faculty member in advance of the affected class session, except in an emergency situation.

Students who miss three (3) or more class sessions in any given course are at risk of failing the course. Clinical Psychology students are required to take the following courses:

**At the MA Level**

- GPSY 6100 Proseminar
- The 7 required courses
- The 9 additional elective credits (three 3-credit courses in psychology)

**At the PhD Level (60 Credits Total)**

- GPSY 7002/7003 Diagnostic Testing I and II
- GPSY 7009 Clinical Psychology Externship Seminar I
  
  (taken over the course of two semesters in conjunction with a one-year, half-time externships; this is a 1 credit course – 1 credit in the fall semester and 1 credit in the spring).
- GPSY 7010 Clinical Psychology Externship II
  
  (taken for one semester in conjunction with a one-year, half-time externships; can be taken for 1 or 2 credits depending on fit within the student’s schedule)
- GPSY 7005 Diagnostic Interviewing
- GPSY 7008 Clinical Supervision & Consultation
- GPSY 7006 Clinical Theory and Technique: Psychodynamic Therapy
- GPSY 7019 Clinical Theory and Technique: Cognitive Behavioral Therapy
- GPSY 7012 Ethnicity in Clinical Theory and Practice
- GPSY 7013 Evidence-Based Treatments
- GPSY 7001/7004/7007 Diagnostic Assessment of Children -or- Diagnostic Neuropsychological Testing -or- Advanced Diagnostic Testing Assessment of Adult Psychopathology
  
  (Prerequisites: Diagnostic Testing I & Diagnostic Testing II)
- GPSY 7011 Professional Issues and Ethics
- GPSY 6134 Advanced Statistics (4 credit course)
- GPSY 6990 Independent Study with a departmental faculty member
• GPSY 6255  Assessment of Individual Differences
• Sufficient additional (elective or transfer) credits to total 90 credits

**Note:** A proposal to teach History and Systems via an infusion model is currently under review by the NYSED. If this proposal is not approved, the course will also need to be taken during the PhD program per the APA and state licensure requirements.

After satisfactory progress on the Master’s Thesis and acceptance into the Clinical Psychology PhD Program, students are authorized by the faculty to begin practice-related courses in clinical psychology. Courses in Clinical Theory & Techniques and Diagnostic Testing provide the basic preparation both for advanced clinical studies and for clinical practice. In addition, Evidence-Based Treatment and the Seminar on Ethnicity in Clinical Theory and Practice further serve to inform students on empirically supported treatments and provide a basis for understanding the role of ethnicity from a theoretical and clinical perspective. In conjunction with a supervised externship field experience, students register for the Clinical Psychology Externship Seminar during both the fall and spring semesters. Students will also elect specialized clinical courses of interest (e.g., psychoanalytic theory, health psychology, and neuropsychology) to round out the program. Students are required to meet with their Faculty Advisor when planning their curriculum and to receive counseling concerning their academic progress. Each clinical student will receive an advising letter at the beginning of February reminding them to meet with their advisor by the deadline specified in the advising letter, usually in mid to late March.

**ADDITIONAL REQUIREMENTS**

1. Maintenance of a 3.50 GPA continuously until graduation.

2. Clinical placement at The New School Psychotherapy Program (NSPP) in Year 1 of the doctoral program. Along with a research and professional seminar (case conference), 1st year practicum students will carry 2 patients in individual psychotherapy and receive 1 hour of individual supervision and 1.5 hours of group supervision at NSPP. Treatment will be videotaped, and both patients and student therapists will complete various questionnaires in order to help monitor and evaluate the treatment, and as part of the ongoing clinical training process. Concurrently, students will also partake in an external clinical placement (4-5 hours/week) at a hospital or community clinic setting.

3. Successful and timely completion of the Preliminary Dissertation Proposal Defense and Dissertation Proposal Defense. The Preliminary Dissertation Proposal Defense should be completed in the Spring Term of Year 2 of the doctoral program and the Proposal Defense must be successfully defended in the Spring Term prior to internship application year (which begins the following fall).

4. One year of half time (16 hours per week; 20 hours may be permissible for child-specific placement if students are in good standing with their dissertation and, clinical and coursework) externship training during Year 2 of the doctoral program

5. One year of half time (16-20 hours per week) externship training during Year 3.
6. One year of full time (or two years part time) predoctoral clinical psychology internship (during this year students are required to register for 1 credit of Internship each semester).

7. Completion and successful defense of the dissertation.

8. A two (clock)-hour course on the identification and reporting of child abuse. This course is mandated by the State of New York for licensure. Students are required to take this course in their first year of doctoral study.

**SUMMARY OF DEGREE REQUIREMENTS**

- 90 credits (88 credits completed before internship)
- Program completion within 10 year time-to-degree limit (this time includes time taken to complete the MA degree)
- 3.50 cumulative GPA, which must be maintained throughout the program.
- GPSY 6902: 1-year practicum at New School Psychotherapy Program, during first year of study (1 credit in fall semester and 1 credit in spring semester)
- GPSY 7009 and 7010 Clinical Psychology Externship Seminar I and II
- GPSY 7006 Clinical Theory and Technique: Psychodynamic Therapy
- GPSY 7019 Clinical Theory and Technique: Cognitive Behavioral Therapy
- GPSY 7005 Diagnostic Interviewing
- GPSY 7008 Clinical Supervision & Consultation
- GPSY 7004 Diagnostic Neuropsychological Testing, GPSY 7001 Diagnostic Assessment of Children, or GPSY 7007 Advanced Diagnostic Testing and Assessment of Adult Psychopathology
- GPSY 7002 and 7003 Diagnostic Testing I and II
- GPSY 7011 Professional Issues and Ethics
- GPSY 6134 Advanced Statistics
- GPSY 6101 Introduction to Cognitive Neuroscience
- GPSY 5110 Introduction to Cognitive Psychology, GPSY 5102 Visual Perception and Cognition, or GPSY 6107 Language and Thought
- GPSY 5120 Social Psychology
- GPSY 6155 Developmental Psychology or GPSY 6281 Development and Psychopathology
- GPSY 5155 Adult Psychopathology
- GPSY 6133 Introduction to Statistics and Research Design
- GPSY 6238 Research Methods
- GPSY 7012 Ethnicity in Clinical Theory and Practice
- GPSY 7013 Evidence-Based Treatment
- GPSY 6255 Assessment of Individual Differences
- Elective courses to meet the 90 credit degree requirement
- 3 credits of GPSY 6990 Independent Study with a departmental faculty member
- 1 year of half-time (16-20 hours) externship during second year
- 1 year of half-time (16-20 hours) externship during third year
- 1 year of full-time (or 2 years part time) predoctoral internship (2 credits: 1 credit fall and 1 credit spring of internship year)
- Successful completion and defense of Research Master’s Thesis by end of first year in program.
- Successful completion and defense of Preliminary Dissertation Proposal Defense
- Successful completion and defense of Dissertation Proposal Defense
- Successful completion of Doctoral Dissertation and Dissertation Defense

Maximum of 30 credits can be transferred in from another graduate institution at the doctoral level. Appropriate approval from the department chair is required.

*Students are required to take one Advanced Assessment course (Personality, Child or Neuro)*
The clinical program is 90 credits.

66-68 credits (including MA degree) are accounted for within these 90 credits.

For MHSAC students, 69-71 credits are accounted for within these 90 credits.

2 elective seminars are required within the 90 credits at either the MA or PhD level.

Students with prior MA degrees who transfer in credits at the PhD level will have less room for elective credits.

At the MA level, non-MHSAC track students who apply to the clinical program have 3 elective credits to work with.

**CLINICAL TRAINING SEQUENCE**

*Professional Liability Insurance*

All NSSR Clinical Psychology PhD students are covered by The New School’s School Professional Liability Policy for their clinical work on externships and internships obtained as part of their sequence of clinical training in the program.

The New School policy DOES NOT cover additional clinical experiences in which students are engaged. The clinical program requires that all students secure their own professional liability coverage for the duration of their enrollment in the program. For APA student members, there is a student professional liability program available at low cost, approximately $35.00 per year. For further details, contact www.apait.org.

**FIRST YEAR STUDENTS CLINICAL TRAINING EXPERIENCE AT THE NEW SCHOOL PSYCHOTHERAPY RESEARCH PROGRAM (NSPRP) AND AFFILIATED HOSPITAL/CLINICS**

Updated May 21, 2018

*First Year*

Through an integrated sequence of coursework, clinical supervision, case conferences, and practicum experiences, first year students in the New School Clinical Psychology doctoral program will receive a comprehensive foundation in diagnostic interviewing, assessment, and basic clinical skills, and exposure to psychodynamic, cognitive-behavioral and other approaches to therapy. Clinical training will take place at a) the New School Psychotherapy Research Program (NSPRP) and b) an inpatient or community health setting for approximately 12 hours/week. The NSPRP practicum will include individual therapy cases, individual and group supervision, case conference, and other clinically relevant training experiences aimed at helping students to develop as scientist-practitioners. In addition, students will co-lead therapy groups at an inpatient hospital setting or a community health clinic. Students may be expected to begin their off-site placements as early as July, depending on the specific site. For 2018-2019, students will be placed at the following sites: Lenox Hill Hospital, Institute for Family Health, Long Island Jewish Medical Center- Zucker Hillside Hospital Women’s Inpatient Unit, South Beach Psychiatric Center (Long Island), Coney Island Hospital. The NSPRP placement typically
begins on the Tuesday following Labor Day in September and typically ends at the end of the academic year.

NSPRP Practicum & Supervision

This in-house training program involves weekly video-recorded psychotherapy with a caseload of a minimum of two clients for 20 sessions each, thorough documentation of therapy sessions in Theranest, administration of at least 2 phone screens per semester, intakes as assigned, and weekly attendance in case conference. Students will receive 2 hours of weekly supervision: 1 hour of individual supervision and 1 hour of group supervision per week. In addition, students will receive a minimum of half an hour a week of group supervision at their off-site clinical placement.

Case Conference

All students enrolled in the NSPRP practicum are required to participate in a year-long weekly case conference meeting led by the NSPRP Director, Dr. Richelle Allen. This course is focused on the development of foundational clinical skills that cut across theoretical orientations. Course activities involve applied engagement with major works in the field and the presentation and thoughtful discussion of case material. Additionally, each class will include a check-in regarding programmatic and procedural topics followed by discussion of literature relevant to the students’ clinical work, then a presentation involving verbal case formulation and section of a video-recorded therapy session. The Case Conference meetings also provide opportunities for students to address administrative and clinical issues related to their work at the NSPRP. On a monthly schedule, invited guest speakers will speak on a variety of clinical and research topics to supplement students’ training. Students are required to attend the Clinical Case Conference, read and be prepared to discuss assigned readings, and participate actively during the open discussions.

Assessment Training

All first year students will be trained in diagnostic interviewing, risk assessment (C-SSRS) and diagnostic screening (The Mini International Neuropsychiatric Interview, 6.0) during Orientation and continued training in the diagnostic interviewing and case conference courses.

Second Year & Beyond: Clinical Externship Placements

The primary objective of externship training (16 to 20 hours per week over 2-3 days) is to supplement classroom and practicum training with a wide range of clinical experiences. The externship is a placement at an affiliated agency. It is designed to provide the clinical experience needed to support the teaching of principles of psychotherapy in the externship seminar. The externs will serve patients from a variety of age groups, ethnic and socioeconomic backgrounds and diagnostic categories. Clinical supervisors at the agencies also represent diverse backgrounds. A range of diagnostic methods and intervention techniques will be learned. Patient contacts will be closely supervised. Most externship placements are unpaid.

Students can, however, accept paid externships with the permission of the Director of Clinical Training. Students may also use their work study grants towards externship, with the approval
of the director of externship training at respective externship sites. Clinical Program faculty are in communication with externship site supervisors on an ongoing basis to ensure the quality of clinical training and evaluate the progress of students. Formal written evaluations are completed twice per year with ongoing verbal and written communication as needed. Students preparing for externships are encouraged to schedule an appointment with the Assistant Director of Clinical Training, who oversees externship training, in late November of their first year in the Clinical Program to discuss the characteristics and opportunities at the several affiliated externship agencies. A more detailed policy statement about the externship is available from the Director of Clinical Student Affairs. An information externship meeting is held in November of each year and provides additional information regarding the externship process.

Students, as ambassadors of the NSSR, are expected to remain professional in all matters, particularly when dealing with externship and internship sites. Behavior deemed to be unprofessional will result in departmental sanctions.

Students are bound by the agreed upon rules of the PSYDNYS, the New York area psychology directors of doctoral, internship and externship training programs. Detailed guidelines are provided to all clinical doctoral students each year as they are finalized and all students are asked to sign a Disclosures and Responsibilities Agreement prior to beginning placements. Students must honor any externship acceptance they make.

For 2017-2018, The New School Clinical Psychology doctoral students have secured Externship placements at the affiliated agencies listed below. Placements at additional agencies may be available in subsequent years. A list and description of clinical placement sites is distributed each year at the Externship informational meeting in November.

- Addiction Institute at Mount Sinai (AIMS)
- Baruch College Counseling
- Bensonhurst OPD South Beach Psychiatric Center
- Bronx Lebanon Hospital
- Brooklyn College Counseling
- Brooklyn VA MST track
- Brooklyn VA - Psychosocial Rehabilitation
- Child Study Center at Hassenfeld Children’s Hospital of New York at NYU Langone
- Columbia University medical Center/NYP Lucy Wicks Track
- Cornell New York Hospital
- Creedmoor Psychiatric Center
- Fordham University CC
- Ft. Hamilton Clinic- South Beach Psychiatric Center
- The Gender & Family Project @ The Ackerman Institute for the Family
- Gouverneur Health- Trauma Track
- Institute for Psychoanalytic Training and Research (IPTAR)
- Lenox Hill Outpatient Center for Mental Health
- Maimonides Wellness Recovery Programs
- The Motherhood Center
- Mt Sinai Pediatric Neuropsych
- The New School Counseling Services
- North Central Bronx Hospital
- NYU Postdoctoral Program in Psychotherapy & Psychoanalysis
- NYU WTC
- Purchase College Counseling Center
- South Beach Psychiatric Center - Heights Hill

Externship supervisors will prepare, together with the extern, mid-year and end of year evaluation reports on the extern’s progress and performance. Students will have the opportunity to discuss their training experiences in the externship seminar. Externs are responsible for
making certain these evaluations reach the Director of Clinical Student Affairs to ensure they receive credit on their transcripts for them. Externs are also responsible for completing evaluations of their externship experiences by the end of the spring semester in which they complete their placements.

Students should note that more advanced externship experiences requiring greater than 16 hours per week are appropriate for senior students (e.g. in years 3 and 4) who are progressing well in academic, clinical and research areas of the program.

Advanced clinical students are strongly encouraged to participate in a mini-clinical practicum at The New School Counseling Center where they will conduct weekly psychotherapy sessions with a maximum of 6 patients per week, receive individual supervision with a staff member and group supervision with the director of the counseling service. Students will be invited to attend the Student Counseling Center professional development meetings. The practicum begins in September and concludes at the end of the spring semester. As an alternative, students may elect to participate in supplementary externship experiences in child, neuropsychology, or diagnostic testing if they hold interests in these areas and plan to apply for internships which strongly align with these experiences.

**PREDOCTORAL CLINICAL PSYCHOLOGY INTERNSHIPS**

Clinical psychology doctoral students who have demonstrated that they are in a position to complete all of the following program requirements by the end of the Spring semester prior to their application to internship may apply for internship pending final faculty approval: Students must have completed all coursework, including satisfaction of any incomplete coursework; have a minimum 3.50 GPA; have satisfactorily completed the NSPRP Practicum and one approved clinical psychology externship placement; successfully completed the Research Master’s thesis, Preliminary Dissertation Proposal Defense and the Dissertation Proposal Defense, including all required revisions to each of these research requirements and complete data collection. The clinical faculty will meet to review students’ overall progress in the program and determine whether or not students may apply for internship in a given year. If a student has had difficulties in any of the program areas listed above, the Director of Clinical Training and the clinical faculty may require that the student postpone his or her internship application until a later year. Students must be granted approval by the Director of Clinical Training before registering for the National Internship Match.

**IMPORTANT NOTE:** Students must successfully defend their dissertation proposals during the Spring Term prior to application for internship and data collection must be completed prior to November 1 of the fall semester in which a student applies for internship. As well, students must have either published an article in a refereed journal or book chapter as an author or co-author or presented at least three papers/posters/workshops at regional, national or international professional conferences or meetings prior to the first internship application deadline (Nov 1). The latter requirement is in concert with the Council of University Directors of Clinical Psychology (CUDCP) Expectations for Internship Eligibility (adopted 02/22/2011).

Students who do not successfully defend their dissertation proposals during the third year of the program may be asked by the clinical faculty to defend their dissertations prior to applying for internship.
New York State requires that the internship year be approved by the faculty. The Program exercises this requirement in the first instance by usually restricting your choice to institutions that have been accredited by the APA. Accredited internships will be approved without question by the Program as meeting the requirements for the PhD in Clinical Psychology. Some internships that, for various reasons, have not sought APA accreditation also may offer general training of high quality, or may offer special clinical experiences that are particularly desired by a student. A student must obtain permission from the Director of Clinical Training before applying for and ranking an internship that is not APA-accredited.

The Clinical Program sponsors Internship Night in May, during which prospective applicants meet with current interns, faculty and the director of clinical student affairs to discuss the intricacies of the application and interview processes. Subsequently, students are encouraged to meet for formal and informal application review sessions with their faculty advisors, the director and assistant director of clinical training and the director of clinical student affairs.

As part of the internship advising process for students, all internship applicants are required to hand in to the Director of Clinical Training completed applications, including essays and sample testing and treatment summaries, by September 1 of the internship application period. Students are also scheduled for mock interview and feedback sessions with faculty, as well as a specialized interviewing and diagnostic testing preparatory meeting in advance of internship interviews.

The internship application process is time consuming. Students should plan to allot themselves sufficient time for the planning and preparation of internship applications. Students will need to prepare an online APPIC application, up-to-date curriculum vita, letters of reference from The New School faculty members and external clinical supervisors, essays and work samples such as test reports and case summaries.

Students are advised to familiarize themselves with the application procedures and timetable for each of the internship settings in which they are interested.

The APPIC Internship Matching Program requires students to submit their ranking list of sites by the beginning of February to National Matching Services. It is considered improper for internships to indicate acceptance to a student, or to invite a commitment to accept by a student, before that date. Please inform the Director of Clinical Training if any such events occur. Faculty and staff will direct students to the published APPIC policy on internship offers and acceptances, available at appic.org. Compliance with this policy is expected of all The New School applicants for predoctoral internship placements. During mid to late February, National Matching Services will notify students of acceptance to an internship program. There is a second phase to the Match in March which attempts to connect unmatched applicants with internship program openings.

Internship schedules vary from agency to agency, but generally begin between July and September and last 12 months. The exact duration of an internship placement is determined by each agency. Graduation from The New School Clinical Psychology doctoral program may not take place until a one-year, full-time (or equivalent) approved predoctoral clinical psychology internship is completed. Increasingly, internships (except for two-year, part-time internships) offer general training and the intern will rotate through several clinical services. Some elective
assignments may be offered. Specialized training now tends to be reserved for post-doctoral fellowships or “institutes” of various kinds. Students interested in planning for such advanced training should consult with members of the faculty or with the Director of Clinical Training.

The Director of Clinical Training is available to the internship training directors throughout students’ training. Formal written evaluations are completed twice per year with ongoing verbal and written communication, as needed. **Students completing internship who have met all other degree requirements in time for graduation will graduate on August 31st of the same year.**

*Tracking Internship Hours*

All clinical students are required to track their practicum and externship experience hours. The program recommends using the Time2Track system located online at [http://time2track.com](http://time2track.com).

**EVALUATION OF ACADEMIC, RESEARCH, CLINICAL AND PROFESSIONAL PERFORMANCE IN THE CLINICAL PROGRAM**

Every clinical student has a faculty advisor with whom they are working on their dissertation research (and in many cases, their master’s theses as well). In addition to the necessity for ongoing communication between students and faculty advisors regarding student’s research progress, one annual advising meeting is required of all students. During this meeting the student and faculty advisor discuss the scope of the student’s progress in clinical, research, academic and professional areas and document this on advising form which is co-signed by students.

**EVALUATION AND REMEDIATION PRACTICE AND POLICY**

Students are evaluated along academic, clinical, research, interpersonal and professional dimensions. Part of the evaluation process includes attention to interpersonal competence and emotional wellbeing as they impact on professional behavior. An evaluation of all students is conducted by the clinical faculty as a whole at the end of each academic year.

Problems that arise in connection with a student’s progress through program milestones will be discussed by the clinical faculty during regular meetings. Such problems may include lack of communication with a faculty advisor, falling behind schedule with research requirements, poor grades, difficulty in securing internship/externship placements and various academic, clinical and professional concerns. In response to raised concerns, the Clinical Psychology program adheres to the following practice with respect to student progress and milestones. Students will receive an academic review form at the end of each fall and spring semester, apprising them of their standing in the clinical program. In some instances, a student may receive additional letters should a situation arise that requires more frequent monitoring (such as mentioned above).

**Satisfactory Progress:** A student will receive notice of satisfactory progress, stating that the student is currently in good standing within the clinical program and may move forward in clinical training and coursework as planned.
Unsatisfactory progress/First Warning: The clinical program may issue evaluation letters with an initial warning when students have fallen short of program milestones, including problems in their academic, clinical and/or research work along with professional and interpersonal difficulties within the program.

The following are examples of issues that may trigger a first warning in an evaluation letter:

1. Failing to maintain regular contact through mentoring relationship with faculty advisor
2. Failing to progress satisfactorily through the first year NSPP practicum, Externship, or Internship placements
3. Failing to secure clinical externship and/or internship placements
4. Poor clinical evaluation (overall rating of less than 2 (“Meets Expectations”) in any overall clinical area on Evaluation of Clinical Competencies: Externs and Interns form)
5. Poor quality academic coursework (overall rating of less than “Satisfactory” in any area on Core Coursework Evaluation form)
6. Tardiness and/or inconsistent class, lab or clinical attendance
7. Poor professional conduct
8. Poor interpersonal conduct
9. Clinical, academic or research work that is consistently late or incomplete
10. Failing to meet with faculty advisor for mandatory spring advising session
11. Overall rating of less than 2 (“Meets Expectations”) on Annual Clinical Psychology Advising Process: Progress Update and Evaluation of Competencies form
12. Failure to successfully defend Dissertation Proposal by the close of the spring semester of year 3
13. Failure to successfully complete either predoctoral internship training or Dissertation Defense by the end of year 5 (students may elect to postpone applying for internship if they decide to complete their PhD dissertation first)
14. Other instances in which a student is failing to meet program guidelines or requirements

Non-compliance with First Warning Leading to Second Warning: Students are given one opportunity to remedy the area of concern by the defined review date specified in the first warning letter. If a student fails to meet the deadline specified in the warning letter, a second warning letter will be sent and the student will have a registration hold placed on their record. The student will then meet with their faculty advisor to formulate a written plan of remedy and this plan must be signed off on by the Director of Clinical Training in order to have the hold lifted and for the student to resume doctoral studies.

Non-compliance with Second Warning Leading to Probation: If a student fails to adhere to the written plan of action agreed to with his or her faculty advisor following the second warning, the student will be placed on probation in the clinical program. In this instance, a final written plan agreed to between the student, faculty advisor and Director of Clinical Training will take place.
Non-compliance with Probationary Period Leading to Dismissal: If a student fails to adhere to the final written plan of action agreed to with his or her faculty advisor following the probationary period, the student may be subject to dismissal from the clinical program. In such an instance, the circumstances surrounding the student’s case will be reviewed by the clinical faculty and Assistant Dean of Academic Affairs.

Time-to-degree limit: The time to degree limit for clinical doctoral students is 10 years from the time of the beginning of the MA program. Students approaching year 8 will begin to receive warning notices from the office of academic affairs. Students may have the option, at the discretion of the director of clinical training, the department chair and academic affairs, to petition for one extension of one year beyond the limit. If a student receives that one year and has still not completed the program, they may be granted a second year extension but will automatically be placed on probation with the option for the department to dismiss them at the end of the second year. Students are subject to dismissal beyond this limit in accordance with published university policy.

Maintenance of student status requirement: Students are required to maintain status in the program on a consistent basis. In accordance with published university policy, failure to maintain status for four (4) terms will result in a student’s removal from the clinical program.

Letter of Dismissal from the Program for ethical violation: The Clinical Psychology program reserves the right to review serious problems (e.g. an ethical violation or serious concerns about clinical, interpersonal or professional activities) and dismiss a student immediately if so decided upon careful review by the clinical faculty and Clinical Standards Committee. Students in the Clinical Psychology PhD program are required to adhere to The American Psychological Association Code of Ethics in academic, research and clinical practice. The APA Code of Ethics will be used to guide the outcome of ethical violations by clinical students including students’ behavior with peers and colleagues in every domain and setting of the clinical program.

Student Concerns, Petitions, and Grievances

1. **Students with a concern about a course** should first consult with the instructor involved. If a student does not feel comfortable doing so, he/she/they should see his/her/their Faculty Advisor for guidance. If necessary, students may then bring the concern to the Department Chair(s) (if the issue involves a General Psychology MA Program or CSD PhD course) or the Director of Clinical training (if it involves a Clinical Psychology PhD course).

2. **Clinical students who have concerns about clinical program policies or decisions** should speak directly with the Director of Clinical Training (DCT). Students who wish to file a formal petition regarding a clinical program policy or decision should send a letter outlining the details and grounds for concern to the DCT. The Director will convene a meeting of the Standards and Grievance Committee and, depending on the nature and seriousness of the problem(s), respond to the student in writing or arrange a meeting with the student(s) to discuss the matter further. From this point, if a resolution is still not reached and/or students may bring a grievance further to the Assistant Dean of Curriculum and Academic Affairs at the New School for Social Research.
3. A peer ombuds is available to students in the Clinical Psychology program who feel they have experienced or witnessed a violation of the New School’s code of conduct, while on or off campus, perpetrated by a past or present student, faculty member, or employee of the New School. The ombuds is an informal, neutral, independent, and in most cases, confidential resource for new and continuing clinical graduate students to raise questions or concerns about any aspect of their graduate experiences. The peer ombuds serves as a sounding board who also connects students to resources on campus and if applicable, provides support through the decision-making process. The ombuds does not file formal complaints and is unable to formally advocate for students in university or program matters. To maintain confidentiality, the ombuds does not keep official records of visits, other than tracking the number and general type of complaints. However, an ombuds must report situations in which students and others are in imminent risk of harm. Students wishing to schedule a confidential meeting with the Clinical Student Ombuds may send a brief email to clinicalpsychombuds@newschool.edu. The peer ombuds will schedule an individual appointment to speak in person or by phone. To preserve confidentiality, face-to-face meetings will be held in a reserved room on campus but located outside of the psychology department.

4. The New School Ombuds Office is specifically designated to address student concerns. Students who prefer to speak to an ombuds outside of the department are advised to contact that office: Keisha Davenport-Ramirez (DavenpoK@newschool.edu) 212.229.8996.

5. Students wishing to file a grievance against the Psychology Department should first send a letter to the Psychology Department Chair(s). The Department Chair(s) will further consult with the Standards and Grievance Committee. As with concerns, petitions and grievances against the clinical program, the Psychology Department leadership will consult with the Assistant Dean of Curriculum and Academic Affairs if a resolution is not reached at the departmental level.

**Expected Length of Study and Termination**

The program is structured so that students will spend three years in the Clinical PhD program completing academic and practicum requirements (this does not include the two-year MA program). They are expected to apply for internships in the fall of their third or fourth year of the program. Although the clinical PhD can be completed in 4 years, it is not unusual for students to take an additional year to complete all requirements.

Clinical students must complete all degree requirements within 10 years of matriculation beginning with the MA program. Students will be reminded at the 8 and 9 year mark of the impending 10 year deadline. Failure to complete all requirements by that point may result in termination from the clinical program if an extension of time is not granted (see Time to degree limit on previous page for further information).
ADDITIONAL INFORMATION FOR ADVANCED DOCTORAL STUDENTS

THE DOCTORAL DISSERTATION

All PhD students are required to successfully complete a Dissertation Pre-Proposal and Dissertation Proposal prior to the Doctoral Dissertation Defense. The Doctoral Dissertation is comprised of two documents that will be described in greater detail below.

1. A comprehensive literature review
2. An empirical article

The PhD is awarded in recognition of a significant contribution to knowledge. Psychologists are generally expected to contribute to the research literature. The dissertation requirement is intended to allow students to demonstrate the skills they have developed at carrying out research independently.

Awarding the PhD requires that the student successfully propose and defend the dissertation before a dissertation committee. All dissertation documents are required to be in APA Style and include a title page, references, and appendices.

Note to Clinical Students: Clinical PhD students are required to complete the Dissertation Proposal during the Spring Term of the academic year prior to applying to internship (i.e., by May). Students are strongly encouraged to complete the Dissertation Pre-Proposal in the Fall Term of the academic year prior to applying to internship so that they will be prepared to defend their Dissertation Proposal in the Spring.

PHD DISSERTATION REQUIREMENTS

PhD Dissertation

All Ph.D. students are required to successfully complete a Dissertation Pre-Proposal and Dissertation Proposal prior to the Doctoral Dissertation Defense. The Doctoral Dissertation is comprised of two documents which will be described in greater detail below.: 1) A comprehensive literature review and 2) An empirical article.

The Ph.D. is awarded in recognition of a significant contribution to knowledge. Psychologists are generally expected to contribute to the research literature. The dissertation requirement is intended to allow students to demonstrate the skills they have developed at carrying out research independently.

Awarding the Ph.D. degree requires that the student successfully propose and defend the dissertation before a dissertation committee. All dissertation documents are required to be in APA Style and include a title page, references, and appendices.

Note to Clinical Students: Clinical Ph.D. students are required to complete the Dissertation Proposal during the Spring term of the academic year prior to applying to internship (i.e., by May). Students are strongly encouraged to complete the Dissertation Pre-Proposal in the Fall.
term of the academic year prior to applying to internship so that they will be prepared to defend their Dissertation Proposal in the Spring.

**DISSERTATION PRE-PROPOSAL**

The purpose of the Dissertation Pre-Proposal is to receive feedback from two members of the dissertation committee in a scheduled meeting. The Dissertation Pre-Proposal is typically 4-5 double-spaced pages of main text; however, students should consult with their faculty advisor for specific page requirements/expectations. It does not need to include a comprehensive literature review or extensive references – though it is assumed that the literature will have been consulted. It should, however, include a very brief literature review as well as a basic overview of the study rationale, methodology, hypotheses, and planned analyses. This Dissertation Pre-Proposal must be submitted to the student’s dissertation chair and one other committee member at least two weeks in advance of a scheduled Dissertation Pre-Proposal meeting. Students should consult with their committee members to see if they need to provide paper copies of their proposals or if electronic copies are acceptable.

Once a satisfactory outcome of this Dissertation Pre-Proposal has been achieved, the student is given permission to work toward preparing the full Dissertation Proposal.

All dissertation forms can be obtained from Nichelle Horlacher, the department’s secretary. Upon signatures from the appropriate advisors, forms can be returned to Nichelle for processing.

**DOCTORAL DISSERTATION PROPOSAL AND DEFENSE**

The student will work to expand and refine their Dissertation Pre-Proposal into the full Doctoral Dissertation Proposal. Clinical students intending on applying to internship must have successfully passed their Doctoral Dissertation Proposals (not just the Preliminary Proposal) by the last day of classes in the Spring term (i.e., in May) in order to begin preparation for applying to internship in the fall. The Doctoral Dissertation Proposal should include a literature review that provides a compelling rationale for the research, a methods section that includes a detailed description as well as justification for the procedures and measures to be utilized, as well as a list of references. Any questionnaires or standardized scales to be utilized should appear as an Appendix to the Proposal.

The Doctoral Dissertation Proposal Defense will be scheduled with the requisite number of three departmental committee members (or 2 Psychology Department faculty and 1 approved outside expert). The Doctoral Dissertation Proposal must be submitted to the student’s dissertation chair and two other committee members at least two weeks in advance of a scheduled Dissertation Proposal Defense and must be written in APA Style. Students should consult with their committee members to check whether they need to provide paper copies of their proposals or if electronic copies are acceptable. Students should create a brief PowerPoint presentation (i.e., 20 minutes) of their study rationale, design, measures, and proposed analyses to be discussed during the meeting.

**PHD DISSERTATION**

The PhD dissertation will consist of two separate, but related portions:
• **Literature Review.** The first portion will consist of a stand-alone literature review article that is submitted in a form that is potentially acceptable to a peer review journal. This article should be approximately 10,000 words or 25-30 (double-spaced) pages in length (excluding references), and will review theoretical and empirical research relevant to the topic that the dissertation research focuses on. The article will be written in APA format, and should be similar in nature and structure to a Psychological Bulletin article. It should be critical and synthetic in nature and written at a level of sophistication needed for submission to a good, peer review journal. This review article will be based, in part, on the student’s literature review for the Dissertation Proposal, but will be revised in light of his or her evolving thinking (as well as relevant new literature emerging), while the dissertation data are being collected.

• **Empirical Article.** The second portion will consist of a stand-alone empirical article that is written in a form that will be potentially acceptable to a peer review journal. This article should be approximately 10,000 words or 25-30 pages (double spaced) in length (including references), and should conform to APA format. Students should familiarize themselves with the types of articles that appear in quality journals relevant to their area of research, and use these as models when writing their dissertations.

**OUTLINE OF PROCEDURES FOR PHD REQUIREMENTS**

1. Developing a dissertation proposal should be a collaborative effort. Students are encouraged to begin talking with faculty members about possible dissertation ideas in the first year of the doctoral program, or in the M.A. program, if possible. The dissertation proposal should be the product of this dialogue rather than the beginning point.

2. Pick a dissertation topic, discuss it with one or more faculty members and obtain the agreement of one of them to supervise the research.

    A dissertation committee typically consists of three members of the Psychology faculty. The dissertation chair must be a member of the non-adjunct Psychology faculty. In addition, a NSSR member (the outside reader or Dean’s Representative) from another department must participate in the defense of the dissertation. The outside reader is assigned by the Dean’s Office of Academic Affairs. When students are ready to schedule their Dissertation Defenses, they need to submit the Dean’s Representative request form online and contact Ellen Freeberg in order to obtain a Dean’s Representative for the defense meeting. A researcher who is not a member of our faculty may serve as the de facto supervisor of a dissertation. She or he may not chair a dissertation, however. To serve as a member of a dissertation committee, an outside researcher should be an established scholar, expert in the area of the proposed dissertation and preferably on the faculty of an academic institution or on the staff of a teaching hospital or equivalent institution. The C.V. of such a proposed outside supervisor should be submitted to Nichelle who will refer it to the Department Chair. The Dissertation Chair and the student will decide which additional faculty will serve as the second and third members of the Dissertation Committee. A committee must have at least two members who are members of our faculty.
The function of the Dissertation Chair may vary. For most dissertations, supervision will fall largely to the Chair. For other topics, typically those at the margins of the Chair’s expertise, the project may be “co-supervised,” that is, the second and third members of the committee would be expected to play a more active role. When the student’s research prospectus and committee are approved by the Dissertation Chair and the Department Chair respectively, the Ph.D. Oral Defense of the Dissertation Proposal Examination may then be scheduled.

3. You can have at most fifteen outstanding credits toward fulfilling Ph.D. course requirements and must have completed the Advanced Statistics, in order to schedule the Dissertation Proposal Defense. When you are prepared to take your Dissertation Proposal Defense, you must set a date and time agreeable to all committee members (including the Dean’s representative). When you have done so, please see a student advisor to inquire about additional paperwork and eligibility requirements. You can also schedule the date and time of the defense, as well as reserve a room for it, with the assistance of the department secretary.

4. Human subjects protection: If your research does not fall into an “exempt” category under the Department of Health and Human Services guidelines for research involving human subjects, you must submit the project to the Institutional Review Board for review after having successfully passed the Oral Proposal Defense. See the provost’s website for information: http://www.newschool.edu/provost/research-support-human-subjects-research.

Students are only allowed to begin collecting data once they have formal approval from their committee. If your study is being done with patients in a teaching hospital or other institution, your research will have to be approved by the Internal Review Board of that institution as well. Learn about these particular requirements as soon as possible.

6. Collect and analyze your data and write your dissertation, consulting with your dissertation supervisor whenever necessary. It is now required that all data for your dissertation be collected prior to applying for Pre-Doctoral Internship (typically by November 1st).

7. Before your dissertation defense, make sure you have completed all course requirements, language requirements, and oral examinations. Check with your student advisor for any needed assistance and/or paperwork to file with the department. Apply to graduate via MyNewSchool by the deadline (preferably one semester prior to graduation).

8. Contact Nichelle via email (at least two weeks in advance, sooner is better) to let her know of your defense date and time once confirmed by all committee members (including your Dean’s Representative). Nichelle will assist with room scheduling and paperwork. She will send you and your committee chair a reminder before your defense.

**All students are required to defend their dissertation in person. If you cannot be physically present for your defense, you must set up a phone AND video link so you can be both seen and heard by your committee. For questions, please contact your department.

**The last day to schedule a defense is November 18th for a January degree conferral and April 18th for a May degree conferral. If you must schedule a defense outside of
those deadlines, contact Tsuya Yee at YeeT@newschool.edu to obtain permission and instructions.

10. Submit copies of the dissertation to your committee, including the outside reader and Dean’s Rep and one copy to the Dean’s Office - Student Academic Affairs* three (3) weeks prior to the defense. The copy to the Dean’s Office is submitted electronically*; upload it to this URL: www.etdadmin.com/newschool.

11. After you successfully defend, make sure your department prepares and submits all acceptance forms (Dissertation Defense Cover Sheet and Dissertation Acceptance Statement) to the Registrar’s Office. Nichelle will assist with your forms. See the Ph.D. Guidelines for NSSR found on the web: http://www.newschool.edu/nssr/graduation-phd-guidelines/.

**If your committee requests revisions at your defense and indicates that on the Defense Cover Sheet, your committee chair must inform Nichelle once the revisions have been completed in a satisfactory manner. Nichelle will submit a memo to the Registrar’s Office once revisions are confirmed.

12. Check with the Dean’s Office - Student Academic Affairs for final formatting corrections. The Dissertation Reader (dissertationreader@newschool.edu) is the NSSR’s administrator that ensures that the final formatting of the dissertation meets the NSSR’s requirements. Please send a copy to this individual as well.

13. Complete final revisions, and turn in the final version of your manuscript to the Dean’s Office - Student Academic Affairs no later than January 15 for a January degree or the Monday after commencement in May for a May degree at this URL: www.etdadmin.com/newschool.

Before submitting your dissertation, review the UMI Guide to Preparing Your Manuscript for Submission to ProQuest/UMI:

RESEARCH WITH HUMAN SUBJECTS

All research involving human subjects, with very few exceptions, must be approved by the Internal Review Board. If the research is being done at another institution, review by that institution’s Human Subjects Committee will also be required to assure the protection of the subjects and to assure that the prospective gains of the research outweigh any possible risks to subjects. Such approval must be obtained before the research may begin.

The specific kinds of research that are exempt from review are:

1. Research conducted in established or commonly accepted educational settings, involving normal educational practices such as (a) research on regular and special education instructional strategies, or (b) research on the effectiveness of, or the comparison among, instructional techniques, curricula, or classroom management methods.

2. Research involving survey or interview procedures, except when all of the following conditions exist: (a) responses are recorded in such a manner that the human subjects can be identified either directly or through identifiers linked to the subjects; (b) the
subject’s responses, if they would become known outside the research, could reasonably place the subject at risk of criminal or civil liability, or be damaging to the subject’s financial standing or employability; and (c) the research deals with sensitive aspects of the subject’s own behavior, such as illegal conduct, drug use, sexual behavior, or use of alcohol. All research involving survey or interview procedures is exempt, without exception, when the respondents are elected or appointed public officials or candidates for public office.

3. Research involving the observation (including observation by participants) of public behavior, except when all of the following conditions exist: (a) observations are recorded in such a manner that the human subjects can be identified, directly or through identifiers linked to the subjects; (b) the observations recorded about the individual, if they became known outside the research, could reasonably place the subject at risk of criminal or civil liability or be damaging to the subject’s financial standing or employability; and (c) the research deals with sensitive aspects of the subject’s own behavior such as illegal conduct, drug use, sexual behavior, or use of alcohol.

4. Research involving the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens, if these sources are publicly available or if the information is recorded by the investigator in such a manner that subjects cannot be identified, directly or through identifiers linked to the subjects.

Since the Internal Review Board meets infrequently, there may be a delay in reviewing your proposal. Some narrowly defined research proposals, however, may receive expedited review. If the research involves “minimal risk” to the subject, meaning that the risk of harm anticipated in the proposed research is not greater in probability and magnitude than that ordinarily encountered in daily life, or during the performance of routine physical or psychological examinations or tests, expedited review may be possible. Details about the review procedure and the forms to be filled out may be obtained from: http://www.newschool.edu/provost/research-support-human-subjects-research/.
COMPUTER FACILITIES

The Academic Computer Center is located on the seventh floor of the NSSR Building (6 E 16th St, room D707). There are additional facilities at the University Computing Center at 55 West 13th Street on the third floor. Students (who open an account with Academic Computing) and faculty members may use the Windows and Macintosh microcomputers for class assignments, labs, research and word-processing.

Many software programs are available for student use, including Microsoft Word, Microsoft Power Point and SPSS (the statistics program). E-mail and access to the Internet are also available to all students. All students must activate their New School account, which receives important university announcements.

Students whose primary internet access account is elsewhere can easily have all New School e-mails forwarded to their other account.

HOUSING

The Off-Campus Housing Center is located on the 5th floor of 79 5th Ave. and can provide information and assistance in finding affordable apartments.

HEALTH INSURANCE

The Student Health Services Center is located at:
80 5th Avenue, 3rd Fl.
New York, NY 10011
Tel.: (212) 229-1671, option 2

Hours: Monday through Friday; 9 a.m. until 4 p.m.

Information regarding the Student Health Center can be found in an information packet which is located in the Student Advisors’ Office or on the university website: http://www.newschool.edu/student-services/health-services/

All questions should be directed to the Student Health Services Center at 212.229.1671.

STUDY GROUPS

Study groups are an institution at The New School. They are a means by which students can become better acquainted, learn together and discuss issues raised in their courses. The large size of the introductory lecture courses tends to make having extended discussion during classes difficult. While most professors meet this problem by supplementing lectures with weekly discussion sessions, students have also found it advantageous to form their own study groups. These groups are generally formed informally.

Students entering the third year of the clinical Ph.D. program should submit this form to the Director of Clinical Student Affairs’ Office on Monday during the second week of classes in September. Your dissertation proposal should be submitted on the same day to the Chair of your dissertation committee.

DATE: ___________ STUDENT NAME: ________________________________

EMAIL ADDRESS: ______________________ PHONE #: __________________

DATE: __________________________________________________________________

DISSERTATION PROPOSAL TITLE: ____________________________________________

COMMITTEE CHAIR: _______________________________________________________

COMMITTEE MEMBER: _____________________________________________________

COMMITTEE MEMBER: _____________________________________________________

OTHER MEMBERS: _________________________________________________________

Note: Permission from the dissertation chair will be required prior to applying for internship. The chair of the dissertation committee will give approval only to those students that clearly will defend a proposal by November 1 of the year during which they are applying for internships.
RESEARCH MASTER'S THESIS / PRELIMINARY PHD PROPOSAL
REQUIREMENT FORM

THE NEW SCHOOL FOR SOCIAL RESEARCH
DEPARTMENT OF PSYCHOLOGY

DATE: ___________ STUDENT NAME: ____________________________

STUDENT ID NUMBER: ____________________________

This student is pursuing a (check one):

☐ MA in Psychology
☐ Clinical Psychology Ph.D.
☐ Cognitive, Social & Developmental Psychology Ph.D.

This form certifies that the named student has completed requirements for his/her (check one):

☐ Research Master’s Thesis
☐ Preliminary Dissertation Proposal Defense

PROJECT TITLE: ____________________________________________

STUDENT SIGNATURE: ______________________________________

I, the first reader, agree that the student has:

☐ Passed without revisions.
☐ Passed with minor revisions.
☐ Passed with major revisions.
☐ Not passed.

Signature: ____________________________________________

Print Name: ____________________________

I, the second reader, agree that the student has:

☐ Passed without revisions.
☐ Passed with minor revisions.
☐ Passed with major revisions.
☐ Not passed.

Signature: ____________________________________________

Print Name: ____________________________

Once signed and dated, students should bring this original form to the Student Advisors’ Office (clinical students also need to give a copy to the director of clinical student affairs). A copy of this form will be filed in the student’s departmental file, and another copy will go to the University Records Office so that the requirement can be recorded on the student’s transcript.
APPENDIX 3 - NSSR ACADEMIC AFFAIRS

Note: University policies and structures change throughout the year, so please check web links for the most up to date information before making decisions based on material in the printed version of this handbook.

- Check your email every Thursday for NSSRNews:Weekly. There you can find information on events, funding, job opportunities, student, alumni, and faculty news, as well as links to photos, social media, and more.
- Visit the Academic Affairs webpage for information about NSSR policies and procedures.
- View our catalog for a comprehensive look at NSSR and New School information and resources.

INSTITUTIONAL FINANCIAL AID, SCHOLARSHIPS, AND ASSISTANCE

Scholarship Information

Continuing students within the same degree program should expect their scholarship to renew each academic year, if they are meeting criteria. Students advancing to the PhD are considered for increases and full funding at the time of application. Students who wish to be considered for increases to their scholarship funding should contact Student Financial Services. Applications for special awards and instructions are available starting February 1st. More information is available online.

Assistantship Information

Applications for Research Assistantships, Teaching Assistantships and Teaching Fellowships are administered through the Provost’s Office. Students will receive announcements of applications and deadlines well in advance of the deadline.

Student Travel Fund Information

The New School for Social Research will provide support for student research and conference travel. Submission of proposals will be due twice in the academic year, on November 1 for travel and conferences occurring between December 15 and June 15 and April 1 for travel and conferences occurring between June 15 and December 15. Please see the Academic Affairs website for more information.

Fee Board

The Fee Board offers partial reimbursements for costs incurred while representing the university at academic conferences. The Fee Board is made up of student representatives from each department and is coordinated by the Graduate Faculty Student Senate. They meet at the end of each semester.

ACADEMIC RESOURCES

NSSR Career Services Information

The Center for Graduate Career and Professional Development provides advice, guidance, and resources for masters and doctoral students seeking academic and professional careers. It regularly hosts workshops and seminars on a wide range of topics that help boost your professional development from topics that show you where to look for external funding to those
geared to helping you create your academic job search materials. Students are also encouraged to meet with their career advisor, Jennifer MacDonald, director of the Center, for one-on-one career advising appointments which are made through Starfish.

**Inter-University Doctoral Consortium**

Along with The New School for Social Research the graduate arts and sciences schools within Columbia University (including Teachers College), CUNY Graduate Center, Fordham University, New York University, Princeton University, Rutgers University, and Stony Brook University form a graduate-level consortium in the arts and sciences. PhD students may petition to take courses through this consortium. Some restrictions apply. More information can be found [here](#).

**Institutional Review Board**

New School students, faculty and staff engaged in research or supervising student research projects must be aware of their responsibilities for ethical conduct in any project involving the use of human subjects. Information for the IRB is available at [online](#).

**Graduate Faculty Student Senate (GFSS)**

GFSS is the representational student governance body for the New School for Social Research. It is charged with representing student interests across departments, and it is the student liaison to the Graduate Faculty administration. Contact: GFSS@newschool.edu

**University Student Senate (USS)**

USS is the representational student governance body for the New School. All schools are allocated representatives based on their student population.

**University Learning Center**

The Learning Center helps students become better writers through individual tutoring sessions. Students may work with tutors on any phase of the writing process, from brainstorming ideas, to developing an outline or rough draft, to revising and editing. Writers of all skill levels benefit from the center's services.

**ACADEMIC POLICIES**

**Academic Review**

NSSR students receive an audit of their academic performance each semester. The Office of Academic Affairs works with Student Advisors and Department Chairs to ensure that students receive updated information about their progress through the department. Academic Affairs coordinates student petitions related to transfer credits, changes of status, changes of department, extensions of time to complete degree requirements, leaves of absence, withdrawals, and grievances. For forms and questions, please contact NSSRAcademicAffairs@newschool.edu

**Time to Degree**

Students have five years to complete all requirements for the MA degree. Students have ten years to complete all requirements (including the MA degree) for the doctoral degree. An extension of time must be granted to continue doctoral studies beyond ten years.
Transfer of Credit

Up to 30 transfer credits, including those granted towards the MA degree may be granted toward the PhD degree for courses. MA students are allowed to transfer up to 3 credits to their MA degrees. Credits older than 10 years from the date of matriculation will not be accepted nor will courses that received a grade of B- or below. Additional requirements set by NSSR and individual departments also apply.

Reenrollment

Students who have failed to register for one, two, or three semesters may petition through the online General Student Petition Form to reenroll in order to continue their studies. Students who have not registered for four or more semesters must apply for readmission through the Admissions Office.

Changes of Department

Students can petition to transfer from one department to another via the online General Student Petition Form. This form should only be used if a student is maintaining the same degree status (MA or PhD) but changing their major (i.e. department).

Student Exit Guidelines: Leave of Absence

Students in good academic standing may petition for a leave of absence by logging into Starfish, and going to the “Request Help” option. There the student will fill out the form indicating on the drop-down menu that “I Am Considering Withdrawing/Taking a Temporary Leave From The New School.” From there the Office of Academic Affairs will be in contact with the student and will process their Exit Form.

It is important to note the following implications of a leave of absence:

- Students may not complete work toward their degree while on leave of absence
- There is a maximum of four semesters’ leave throughout a student’s entire period of study
- Requests for retroactive leaves must be submitted to the university appeals committee at Appeals@newschool.edu.

Recipients of student loans should consult the Office of Financial Aid when contemplating taking a leave of absence. International Students in F-1 or J-1 I-94 status must consult with the International Student and Scholar Services before taking a leave.

GRADING POLICY

Grade Point Average

The semester grade point average is computed at the end of each term by multiplying the number of credits earned in each course by the numerical value associated with the grade received in that course. The grade points for all courses are totaled and then divided by the total number of graded credits completed, including failed courses, if any. The numeric values of the grades are as follows:

- A  4.0
- A–  3.7
The following grades are not figured into GPA:

- W  Withdrawal
- Z  Withdrawal, assigned by instructor
- I  Temporary incomplete
- P  Pass
- IE Incomplete extension
- U  Unsatisfactory
- N  Permanent incomplete
- AU Audit
- GM Grade missing

**Incompletes**

A grade of “I” is a temporary grade and indicates that assigned work has not been completed. The time allowed for the removal of an incomplete is one year after the end of the semester in which the course was offered. After the first year has elapsed the grade is changed to a permanent incomplete (N). An “N” grade can only be overturned in extreme situations and requires approval from the Assistant Dean. Students who attend a class to complete an incomplete grade will be expected to register and pay for the class as an audit. In these cases, students must obtain the instructor’s approval to attend a class through this form. Grades of GM will be converted to N if a grade is not entered within the year. In unusual circumstances, PhD students (only) are eligible to request a 6 month extension via the online General Student Petition Form. The petition will require evidence of approval of the instructor (either a screenshot or PDF of an email), and is subject to further approval by the Department Chair and Assistant Dean of Academic Affairs. Following that, the PhD student may require an additional and final 6 month extension. This must go through the same approval process. To appeal an N that is older than 2 years, please contact the Office of Academic Affairs at NSSRAcademicAffairs@newschool.edu.

**Pass/Fail**

Students have the option of taking certain courses as pass/fail, or P/U. In order to take a class pass/fail, the request must be approved by the instructor. Present your instructor’s approval to your student advisor and they will make the change. This must be completed by the last day to add classes. Changes to pass/fail cannot be approved once the semester is over.

**Grade Review Process**

Students can petition for an academic grade by following the procedure outlined below within 60 days after the grade was posted or within 30 days if the student has petitioned to graduate. Before deciding to appeal, the student must request an informal explanation of the basis of the
grade from the instructor. If the student is not satisfied with the explanation, the student may pursue the matter as follows:

- The student submits a letter outlining any questions and/or objections directly to the faculty member, with a copy to the department chair or director. (If the faculty member is also the chair or director, the copy will be sent to the dean’s office.)
- The instructor submits a written response to the student’s letter within one month of receipt, with a copy to the department chair or director (or the dean’s office). The department chair should assist in resolving the dispute.
- If the chair concurs with the instructor and the student is still not satisfied, the student may appeal in writing (including copies of previous communications) to the dean’s designee. This designee will convene a committee to review all communications, clarify the issues of disagreement, and make a recommendation to the dean of the division. To ensure a fair deliberation for all parties, the committee will always include student and faculty representation.
- The dean’s decision is final.

Please see the Academic Policies page on the Registrar’s website for updated information.

**Repeating a Course**

With approval, graduate students with a grade of B- or below are eligible to petition to repeat that course. Students can request to repeat up to three courses during a single degree program. The initial grade will continue to appear on the transcript, but only the grade earned the second time will be computed into the grade point average. Click here to petition to repeat a course.

**UNIVERSITY POLICIES, VALUES AND STANDARDS**

**Graduation**

The New School confers degrees three times a year: December 31st, May 31st, and August 31st. The commencement ceremony for all graduates is held in May. All degree requirements, as specified in this handbook, must be completed prior to the conferral date for a degree to be awarded. To earn a graduate degree, students must have a minimum 3.0 cumulative GPA, complete departmental requirements, and complete the “Application to Graduate” Form on MyNewSchool (which appears when a student is eligible to graduate). Students are encouraged to apply to graduate at least one semester prior to graduating. Some doctoral programs may require a cumulative GPA above 3.0.

**Academic Honesty and Integrity Policy**

Academic honesty, the duty of every scholar to claim authorship of his or her own work and only for that work and to recognize the contributions of other scholars accurately and completely, is fundamental to the integrity of intellectual debate and the pursuit of knowledge. You can find the full policy here.

**University Code of Conduct**

Student rights and responsibilities codes help ensure that the NSSR is a safe environment conducive to learning. The student code of conduct is based on the principles of fairness, civility, and diversity, and intended to guide our community’s development.
Course Evaluations

Students may submit anonymous course evaluations each semester for the classes in which they are currently enrolled. The evaluation process occurs at the end of each semester with an online resource sent to students’ New School email address.
