Liberal Arts BA/BS

1) **Learning integration**
Demonstrate the ability to explore critical questions in the liberal arts and sciences through innovative, interdisciplinary methods, while also showing a firm grasp of analysis, interpretation and method associated with traditional disciplines.

2) **Intercultural Effectiveness**
Demonstrate knowledge of cultures and cultural practices (one’s own and others), and the complex cognitive skills required for decision making in intercultural contexts. Exhibit flexibility and openness to new ideas.

3) **Critical Thinking Skills**
Demonstrate the capacity to develop and present a persuasive argument; to think, write and speak with clarity and force; and to conduct visual, aural, spatial and/or analytic inquiry. These skills may require the ability to do research; use information effectively and in context; conduct ethical reasoning; and/or exhibit quantitative fluency and communicative fluency orally and in writing.

4) **Resourcefulness**
Demonstrate abilities to employ methods, skills, tools and systems, including technologies, to conduct research on and communicate about topics and questions; to access, evaluate and manage information; to prepare and present work and effectively communicate to others.

5) **Self-Inquiry**
Demonstrate a desire to learn, ask questions, and consider new ideas. Take the initiative to learn and reflect upon that learning. Be attentive to the formation of one’s own as well as others’ identity; to engage with and respond to civic, social, environmental and economic challenges at local, national or global levels.
